RE: Minimum Facility Requirements for Soccer Tournaments

At your direction, Chad Collins and I have reviewed the minimum facility requirements to host Post Season Soccer Tournaments that the Board approved in January 2014. Specifically looking to see if our member schools have encountered difficulty in meeting those standards.

In our opinion, it might benefit our member schools to modify the field size requirements for hosting the Regional tournaments. The requirement as of today is: *The games shall be held on a rectangular, 110 to 120 yards long and 65 to 80 yards wide.* We would like to modify the width portion to read *60 to 80 yards wide.*

We would also like to separate the Regional and Semi-state requirements into two separate set of facility requirements. This would allow us to continue to play the semi-state games *on a rectangular, 110 to 120 yards long and 65 to 80 yards wide*, which is our requirement for the State Championships.
