Sports Report	
Sport	Fall Soccer
Positive Developments and Highlights	The season is off to a good start for the most part. The Rules Clinic and supporting videos have been well received by both coaches and officials as to helping illustrate critical rules changes and application.
Issues of Concern (legal, playing Rules, fiscal management, etc.)	DQs continue to be a concern. The real issue is the number of DQs as a result of foul language. It would seem to be a simple issue to address as this type of behavior would never be accepted in the classroom. While the schools have been responsive and supportive of these DQs, we continue to search for the best way to emphasize this expectation and reduce these incidents.
Championship Update/Review	The District Tournaments start the first week of October and culminate with the State Championship on October 28th in Fayette County.
Officials Update/Review	We have seen a modest increase in soccer officials, but still see shortages across the state that have led to rescheduled, postponed, and in some instances cancelled games.
