P.O. Box 431
Elizabethtown, KY 42702

June 29, 2011

Attn: Ms. Lisa Thomas

Re: Vine Grove Elementary

Dear Ms. Thomas

As indicated on drawing SP1.1 the valve and the flow switch that was removed and relocated to the riser behind elevator equipment room 124 A, was full of sediment and was not fully closing. Landmark Sprinkler cleaned the inside of the valve, but cannot accept any responsibility if the valve will not seat properly or hold pressure.

In addition, the valve was not provided with a tamper switch as required by NFPA and the Kentucky Building Code.

Please advise if a tamper switch is to be provided for this valve. The cost to add the tamper switch on the existing valve will be \$140.00.

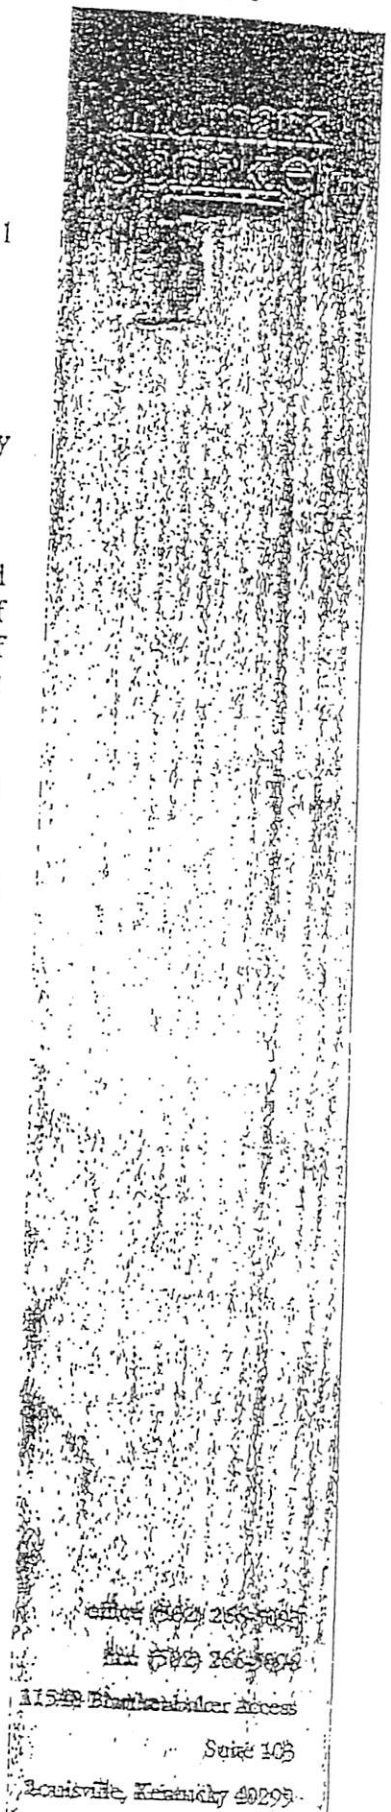

If the valve is required to be replaced, the cost would be \$315.00. The new valve would be a butterfly valve with a built in tamper switch.

If you have any questions or require additional information, please contact the undersigned.

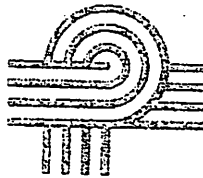

Very Truly Yours,
Landmark Sprinkler Inc.

Subject: Vine Grove Heater Return

Hi Steve,

Per our conversation this morning, I've estimated the approximate credit for the return of (3) QMARK heaters tagged UH-3, -4, & -5. Unless the factory assesses fees other than the 25% restocking fee, the credit would be approximately \$576.00.

Please let me know the decision.

Thank you,

Colleen Banaszak

Subject: VGES Electric Wall Heater Credit

Gary/David:

Attached is Mark McNutt's letter dated November 16 sent by email yesterday. This letter proposes to delete three electric wall heaters from the project in the amount of (\$1,479.00). I asked for this credit upon reviewing the contract documents and seeing these three electric wall heaters being cut in existing masonry walls. I recommend accepting this credit based on the following:

1. I do not see that they contribute positive to the school operation. They may be a maintenance item.
2. Being electric wall heaters they would be relatively inefficient energy wise.
3. I have not heard that there is a need for additional heat at the locations shown.

Please let me know your thoughts.

Mark:

1. When; will Degrella be on site ? Very important that this work is remediated successfully before school starts in the fall.
2. In regard to the two ladder exits from the mezzanine level; I agree with Tim. I disagreed with the DOH plan reviewers in Frankfort in requiring these "exit" and spent a considerable amount of time and two trips to Frankfort to arrive at the change you are now working on in this regard. Please proceed as previously directed until notified otherwise.
3. In regard to the wire mesh and paper; I sent an email yesterday asking for a proposal for to spray this area. Our emails crossed to the ether.

Larry,

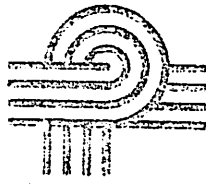

Degrella tile will be onsite. We had as miscommunication.

As you may be aware Tim Obright was onsite today and stated the Mechanical area that has been in question is considered an attic area due to only having HVAC equipment. He also stated that there is no need for additional means of egress out of the mezzanine area. Do we need to proceed with adding the ladders?

Tim also mentioned that in the existing kitchen that the roof deck will need to be addressed as it is the wire mesh and paper.

RE: Vine Grove Elementary School
Architect Project No. 1014
Secondary Exits from Mechanical Mezz's.
Mod. 3

Dear Mark:

Attached is PFGW Mod. #3.1 AND 3.2 dated June 6, 2011 showing two new secondary exits from the Mechanical Mezzanines as required by Kentucky Department of Housing, Building and Construction. This change will require plan layout changes on both second floor and on the Mechanical Mezzanine level. It will also require some existing structural bar joist modifications, 2 additional doors, door frames and hardware, 2 wall mounted ladders and 2 additional exit signs, additional lighting fixtures and etc..

Please proceed with the Mod. 3.1 and 3.2 changes on time and material.

If you have any questions or should you require additional information, please do not hesitate to call us.

Sincerely,

Phil Moyers

Re: Vine Grove Elementary School
Renovations 2011-2012
Vine Grove, Kentucky

Dear Larry:

We are writing in regard to your request for a proposal for deleting the two short walls in the mezzanine and adding a door and frame to the 5th grade classroom in order to create a storage area under the new staircase.

We owe the Owner a credit for labor for not installing two doors, frames, and hardware, and painting the short walls in the mezzanine. We also owe the Owner a credit for deleting the VCT and base in Room 108. This would be for labor only, as the flooring material and base are in the subcontractor's warehouse.

We have determined that we can use one door, frame, and hardware from the mezzanine for the 5th grade storage room door. For the credits listed above and for reuse of the door, frame, and hardware, we offer to complete the storage area as shown, including finishes, for no additional charge. The owner will still take the previous credit of \$553.00 for the deleted drywall work of the short walls in the mezzanine.

Please review and advise if this is acceptable.

If you have any questions or need further information, please call me at our office.

Sincerely,

Mark McNutt, President

RE: Vine Grove Elementary School Renovations
PFGW File No: 1014
BG # 11-132

Dear Mark:

The owner has accepted your proposal of January 23 relating to Classroom 219A and deletion of walls, doors, frames and hardware adjacent to doors 302 and 303 on the mezzanine level.

Attached is our drawing MOD- 33. This drawing shows...

1. Layout of smart board and marker boards.

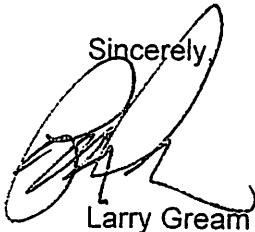

We have adjusted the placement of smart boards and markers boards this room per owners acceptance of your proposal of adding door 214A and providing finishes, light and addition of a sprinkler head for room 219A per MOD.11.

The following is how we understand your proposals ...

| | | |
|---|---|--------------------|
| 1 | Deleting of walls, frames, doors and hardware associated with doors 302 and 303 per your December 7 proposal letter. | Credit of \$553.00 |
| 2 | Providing finishes, lights and add sprinkler head for new room 219A. Install door 219A with materials and labor savings not reflected in credit proposal above. | \$0 |

Please give me a call if you have questions.

Mark:

Attached is WBW's response to GBMC RFI 16. Please note I have modified the mounting height of the HVAC unit from a bottom elevation of 6'-0" to 6'-8" per DOH ADA requirements.

Additionally I would suggest delaying the installation of the unit in 124A Elevator Equipment to a date after the elevator equipment is in place. Last conversations had with you, the elevator contractor had not been finalized.

We also most likely need to discuss installation of the unit in 138 Library Workroom. I will meet with you and John Davis in this regard.

Please give me a call if you have questions relating to this transmittal.

Subject: VGES Casework Room 219

Mark:

In our meeting Wednesday, March 28 I discussed the casework associated with Classroom 219 with you and Mitchell Smith of Smith Laminating. Your revised proposal dated March 21st for Option 1 in the amount of \$3,368.00 was accepted by Gary Milby and myself. This acceptance allows Smith Laminating to proceed with remaining casework in this classroom.

The existing casework in place that was immediately above the back pack storage area is to be turned over to David Wyatt. The casework previously constructed at this location to be adjacent to the ceiling that was constructed but not installed is to be brought from Smith's Laminating shops and also turned over to the owner.

If you have questions relating to this transmittal please give a call.

Subject: VGES Revisions

Mark:

Yesterday afternoon Tuesday, January 31, Gary Milby, Rusty Taylor and I met with Lonnie Dennis and Tim of Trans Electric to review various areas of the project. The following is the result of this meeting:

Title One 111 :

Lonnie has requested that the recently installed marker board this space be move 1' toward the corridor. Please move on T & M.

Computer Lab 217:

1. It was determined that the installed marker board will remain as is and that the smart board will be installed 4" to the west.
2. It was finalized that the installed floor plug that was to serve the teachers desk will be removed and the hole patched and new vct installed at this location.
3. It was determined that a teacher work station will be located at the end of the center rows of computers and nearest to the smart board. This work station will have a computer with key board and a printer on a new piece of casework to be provided outside the contract.
The electricity and data cabling for this work station is to be provided from the installed plastic laminate casework.

We reviewed the electrical requirements with Tim; per our instructions he is to provide 3 data and 1 electrical for the teacher work station along with all other controls and wiring related to the smart board. The receptacles are to be installed approximately half way from the bottom of the oak trim of the casework and the floor.

To provide this electricity and data an access panel will be required to be cut in the casework as shown on attached drawing. Please have Smith Laminating fabricate a plastic laminate cover panel with installation by McNutt Construction.

4. It was determined that the phone (voice) for this will be a wall mounted phone located on the same wall as the marker board and smart board approximately 10" from the drywall corner.

Computer Lab 216:

1. It was determined that the installed marker board will remain as is and that the smart board will be installed 4" to the east.
2. It was finalized that the installed floor plug that was to serve the teachers desk will be removed and the hole patched and new vct installed at this location.

2/1/2012

3. It was determined that a teacher work station will be located at the end of the center rows of computers and nearest to the smart board. This work station will have a computer with key board and a printer on a new piece of casework to be provided outside the contract.

The electricity and data cabling for this work station is to be provided from the installed plastic laminate casework.

We reviewed the electrical requirements with Tim; per our instructions he is to provide 3 data and 1 electrical for the teacher work station along with all other controls and wiring related to the smart board. The receptacles are to be installed approximately half way from the bottom of the oak trim of the casework and the floor.

To provide this electricity and data an access panel will be required to be cut in the casework as shown on attached drawing. Please have Smith Laminating fabricate a plastic laminate cover panel with installation by McNutt Construction.

4. It was determined that the phone (voice) for this room will be a wall mounted phone and located on the same wall as the marker board and smart board approximately 10" from the drywall corner.

Classroom 219:

1. It was determined that the teachers work station will be relocated from the east end to the classroom to the west end of the classroom. Electricity and data is to be installed in the exterior masonry wall.

You are authorized to perform the above work at time and material rates.

Mark:

Yesterday, the teacher in classroom 219 relayed that recently water was coming from under the vct approximately 4' to 5' from the exterior wall. Please review and take necessary action.

Gary:

We reviewed the last drawings issued and found that WBW Engineering MOD E2.3 drawing dated November 22, shows two new electrical outlets in the exterior masonry wall @ 16" above the floor in Classroom 219.

RE: Vine Grove Elementary School Renovations
PFGW File No: 1014
BG # 11-132

Dear Mark:

Attached is our drawing MOD- 33.1. This drawing shows...

1. At the top of the drawing we have shown the contract document layout of plastic laminate casework. Please note units D,E,F,G, H and J have not been installed but perhaps fabricated.

Please provide a proposal with two options as follows ...

2. Elevation labeled Option One shows...

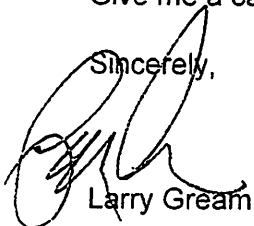

- 2.1 A layout replacing the coat hook units with new cubbies units and...
- 2.2 providing new doors units K, L and M above.
- 2.3 Price this option of removing from wall units A, B and C and turning them over to the owner.
- 2.3 Also turn over units F,G, H and J
- 2.4 Also price this option with turning over units F, G and H if fabricated.

3. Elevation labeled Option Two shows...

- 3.1 A layout with new cubbies units (note: cubbie units will require small adjustment from others)and ...
- 3.2 relocating the "in place" storage units labeled A, B and C so that the top of these units align with the adjacent TW and TS casework and ...
- 3.3 fabrication of units N, O and P.
- ~~3.4 Price this option of removing from wall units A, B and C and turning them over to the owner.~~
- 3.5 Also price this option with turning over units F, G and H if fabricated.

Please provide a proposal giving cost for both options one and two.
Give me a call if you have questions.

Sincerely,

Larry Gream

Re: Vine Grove Elementary School
Renovations 2011-2012
Vine Grove, Kentucky

Dear Rusty:

Per your request to delete the boxwoods and ohio river gravel along the front elevation and extend the sod area 4' to the building please deduct \$1,159.00.

COST BREAKDOWN

| | |
|--------------------------------|---------------|
| Landscape Fabric 1 roll | \$(115.00) |
| River Gravel 4 ton @ 30.00/ton | (120.00) |
| Boxwoods | (925.00) |
| Edging 60' @ 2.70/foot | (132.00) |
| Add Sod 51 sq. yds. @ 2.60/yd. | <u>133.00</u> |
| TOTAL | (\$1,159.00) |

Additionally if we are to not install the sod as originally shown and added above and just seed and straw you can deduct an additional \$944.00.

McNutt Construction Company

Subject: VGES Site Change Items

Mark,

We would like to obtain credit pricing for deletion of the boxwood shrubs and the 4' strips of the Ohio River gravel from the landscaping part of the VGES project along the front of the building. We will also need to extend the new sod over to the building in this pricing. Also, please give us an alternate price to delete the sod between the canopy and the building along the front and substitute straw placement instead in this area. With the future connection of roof leader downspouts to the future storm drain system in this area, it would not be prudent to install these items now, only to have to remove most of this work for the future storm drain connections next year.

We would also like to obtain credit pricing for deletion of the fence enclosure to be installed around the transformer and the emergency generator presently in the contract. This may be changed in the site project design that is upcoming. If you have any questions concerning these requests, please contact me at your convenience.

Thanks,

Rusty

Mark:

Per Mitchell Smith's question yesterday relating to the new Administration casework as it relates to the ceiling height as follows:

1. He relayed that the ceiling height is at 8'-0" in lieu of 8'-4".
2. He asked how the casework should be constructed.

Based on above information we have revised MOD 25.1 to reflect this new height information. As you can see from attached drawing we have lowered the base cabinet and eliminated eight drawers. Please forward a credit based on this reduction in casework.

Subject: Vine Grove - cost proposal for 3 duct heaters

Mark,

Please request price from GBMC and Transelectric for QTY 3 – 1 kw duct heaters with associated electrical service. See attached spec sheet for Warren Technology model CBK. Include options as noted. Provide unit at 120vac single phase from panel A1 or A2. I don't believe David Wyatt wants this on the emergency panel. Each unit can be fed from 20 amp 1 pole spare breaker in these panels.

Duct heaters are to be installed in 6 inch round duct connected to units HP-1-15, HP-1-16, and HP-1-17 located above ceiling of first floor admin area.

Re: Vine Grove Elementary School
Renovations 2011-2012
Vine Grove, Kentucky

Dear Larry:

Per onsite discussions, we propose to reroute the existing sanitary sewer that exits in front of the building. This proposal is for routing around the new canopy footing and tying back into the existing sewer line for the sum of \$3,870.00.

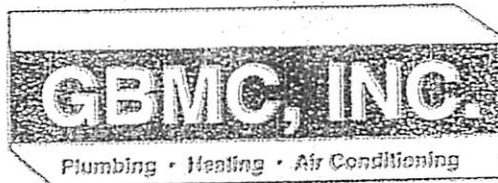

Cost Breakdown

| | |
|-------------------------|---------------|
| GBMC (Attached) | \$3332.00 |
| Bond 1% | 33.00 |
| Overhead and Profit 15% | <u>505.00</u> |
| TOTAL | \$3870.00 |

If you have any questions or need any further information, please call our office.

Sincerely,

Mark McNutt, President

Subject: VGES - Sewer line replacement change

Mark:

On August 3 your forwarded a proposal in the amount of \$3,870.00 to replace an existing clay tile sewer with a new 6" pvc sewer from the front of the building near the main entry to the media center.

On August 9 I received an email from you with a proposal in the amount of \$2,091.00 to install approximately 40' of 6" pvc sewer line to extend under the new walk. This 40' pvc pipe is being installed to prevent cutting of the new walk when the sewer line is extended to a manhole in the future.

These two proposals total \$5,961.00. I have received authorization from Gary Milby to proceed with this change.

Via this email you are authorized to proceed with work described in your August 3 and August 9 correspondence in this regard.

Please combine these two proposals into one proposal via a proposal letter on your letterhead from change order backup purposes.

Larry

Re: Vine Grove Elementary School
Renovations 2011-2012
Vine Grove, Kentucky

Dear Larry:

Please find enclosed a proposal from Trans Electric to install 16 new 24V hold open devices to replace the existing 120V devices. As Trans Electric is offering to replace these for the cost of material only, we are willing to forgo our markups. The cost of this would be \$694.00.

If you have any questions, please contact our office.

Sincerely,

Mark McNutt, President

Subject: VGES storm piping at front canopy

Mark,

Your proposal in the amount of \$3855.00, dated 10/16/12, for installing additional storm piping at the front canopy area at the front of the building is found to be acceptable. You are authorized to proceed with this work. This work is to be performed per verbal instructions as given by Mr. Mike Billings, P.E., at the job site. By copy of this e-mail, we are authorizing the Architect to include this item in the next change-order to this project. We are also requesting that Mr. Billings forward a written follow-up of his verbal instructions to insure that all are in agreement as to what work is to be included in this proposal. If you require any additional information, please contact me at your convenience.

RE: Vine Grove Elementary School
Architect Project No. 1014
GC RFI #7/G.B.M.C.#6

Dear Mark:

Attached is a copy of McNutt RFI No. 7/G.B.M.C. Inc. RFI No. 6 regarding installation of EF #9 (for the kiln) on the new sloped metal roof.

We would like to relocate new sprinkler test line, sprinkler line chase and reroute the duct work as shown on the attached Mod. 8 drawing dated July 14, 2011. Install the Greenheck SQ-90-D (see attachment) direct drive exhaust fan above the ceiling and provide a 24"x10" pre-finish metal louver with bird screen in the exterior masonry wall just below the soffit.

Coordinate Kiln exhaust duct work layout, new chase locate and sprinkler test line installation with all trades.

The ceiling in Kiln 203 and Art Storage 204 to be installed at 8'-0" in lieu of 8'-4 to gain additional space above the ceiling.

If you have any questions or should you require additional information, please do not hesitate to call us.

Sincerely,

Phil Moyers

Phil,

Instead of using a wall cap (with rain hood) a louver would look better. The louver size needs to be a 20" x 12" or some other variation of that face area, e.g. 24" x 10"

Performance certified for installation type B: Free Inlet, Ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). The sound ratings shown are loudness values in fan sones at 1.5 m (5 feet) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation type B: free inlet hemispherical fan sone levels.

Attach: 1014 MOD. 23.1A-Model.pdf
Subject: Music and Title One Room Changes

Mark:

Attached to this email is our drawing MOD.231A. This drawing has changes to Music Room 118 and Title One 117 as noted below and as shown on the drawing.

Music Room 118

1. The six foot marker board is to be relocated from its present location to the exterior wall were shown on drawing MOD 23.1A.
2. The teacher wardrobe and teacher storage units are to be relocate from presently location on exterior wall to location shown on drawing MOD 23.1A and adjacent to the audio visual cabinet.
3. Rotate audio visual casework 90 degrees from present location. If the present flex serving an electrical receptacle will not reach the present box then install the receptacle at the top of the open area.
4. Install top boxes for the AV/TW/TS plastic laminate units this room per contract documents.

Per our conversations last Friday McNutt Construction is authorized to perform work associate with items 1, 2 and 3 above.

Title One

5. Remove recently installed Panduit.
6. Rework electrical work this area in order to provide one fourplex receptacle.
7. Reroute data cabling laying unattached above ceiling tiles and provide a data outlet at location shown on drawing MOD 23.1A.
8. Rotate the Teacher Storage unit original scheduled for this location to face as shown on drawing MOD 23.1A. Please note this area is to have a top box.
9. Construct masonry chase for the piping in the corner of this room per original contract documents.
10. Provide credit for teacher wardrobe unit not desired at this time.

The electrical contractor is authorized to perform work associate with items 5, 6, and 7.

Please give me a call if you have questions regarding above.

On a different item relating to the plastic laminate casework for the complete project. The contract documents call for the plastic laminate case work to be constructed to 1" below the existing ceiling heights. Upon review of the installed units the owner and I would like to obtain a cost proposal that would extend the casework to approximately 1" to 1 1/2" above the ceiling height. This will also entail reworking and removing the ceiling tiles and grid above the new casework and coordinating any HVAC supply or return grills.

Please forward a price for plastic laminate casework installed and a second price for casework not constructed.

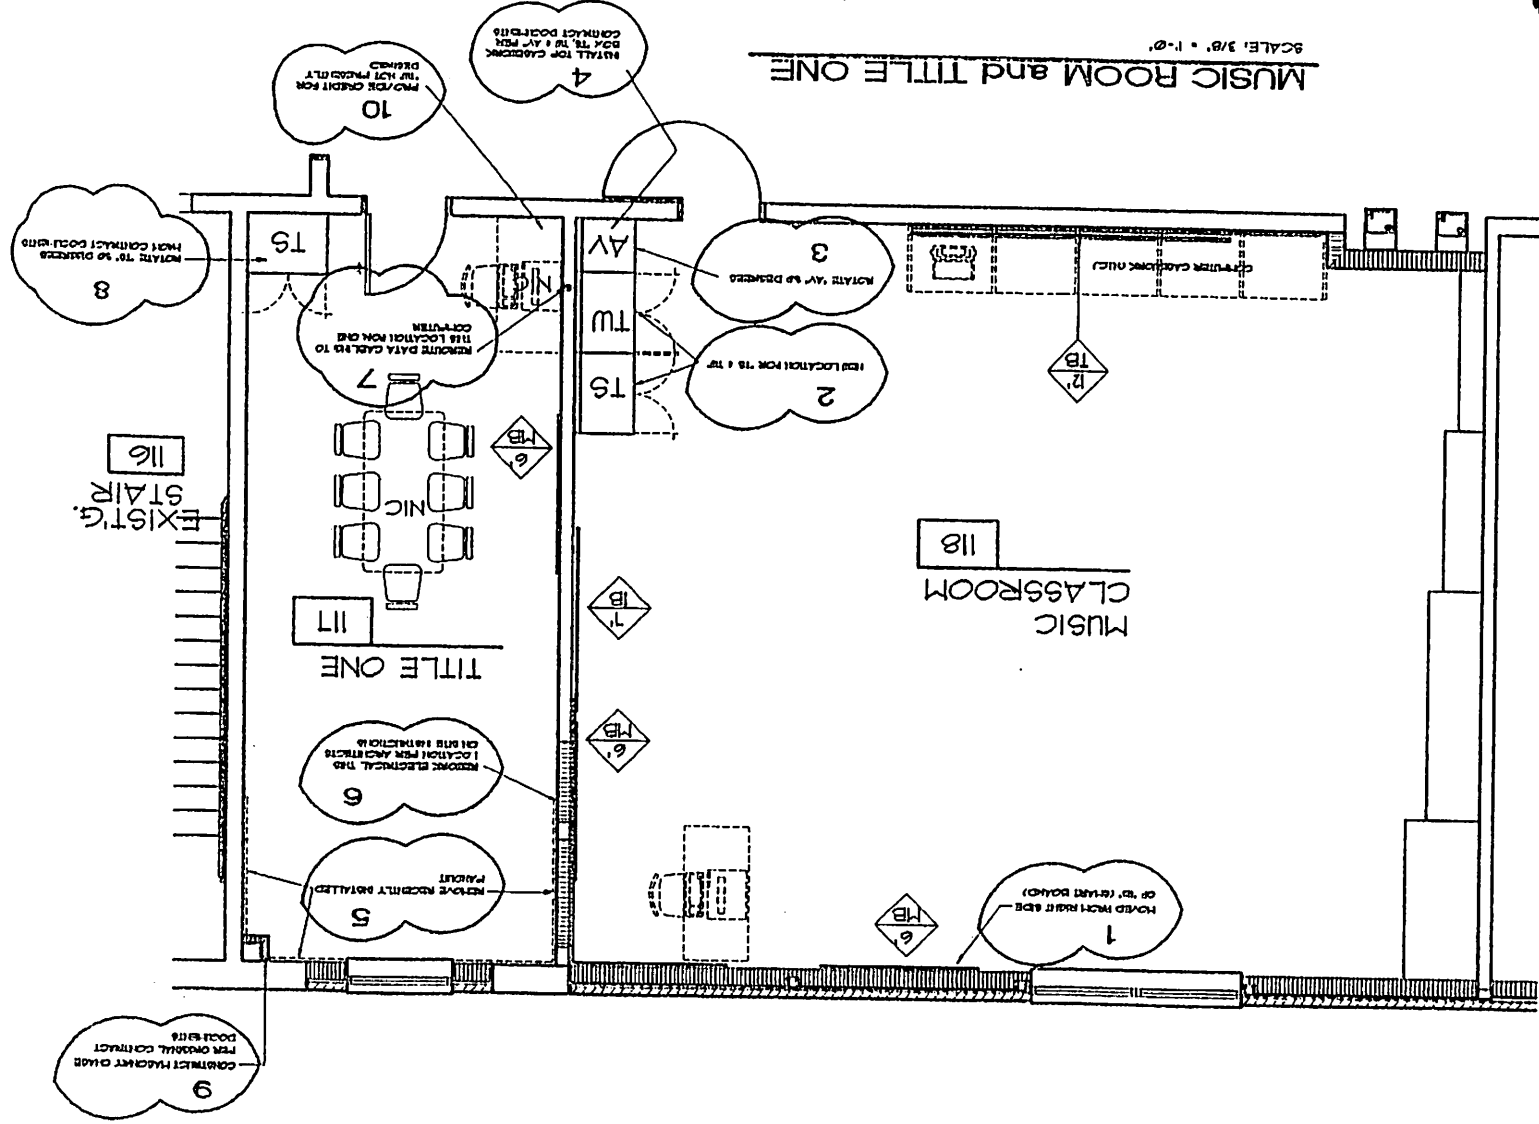

Please let me know if you have any questions regarding this transmittal.
