**Instructions:**

Answering these questions involves considerable and subjective decision-making. Information completed on this form should be gathered from specific products and behaviors such as observation, portfolios, extra-curricular activities, PD activities, etc. The entire document is intended to provide concrete data upon which a summative evaluation will be based. Items are checked "Exceeds," "Meets," "Needs Growth," or "Does Not Meet." Factual comments which recall specific incidents are noted in the space entitled "Evidence." Any standard marked "Needs Growth" requires the development of a growth plan. Any standard marked "Does Not Meet" requires the development of an individual corrective action plan. Evaluator may attach sheets if additional space is needed.

**INSTRUCTIONS:**

Answering these questions involves considerable and subjective decision-making. Information completed on this form should be gathered from specific products and behaviors such as observation, portfolios, extra-curricular activities, PD activities, etc. The entire document is intended to provide concrete data upon which a summative evaluation will be based. Items are checked "Exceeds," "Meets," "Needs Growth," or "Does Not Meet Standard." Factual comments which recall specific incidents are noted in the space entitled "Evidence." Any standard marked "Needs Growth" requires the development of a growth plan. Any standard marked "Does Not Meet" requires the development of an individual corrective action plan. Evaluator may attach sheets if additional space is needed.

**INSTRUCTIONS:**

Answering these questions involves considerable subjective decision-making. Information completed on this form should be gathered from specific products and behaviors such as observations, portfolios, extra-curricular activities, PD activities, etc. The entire document is intended to provide concrete data upon which a summative evaluation will be based. Items are checked "Exceeds," "Meets," "Needs Growth," or "Does Not Meet." Factual comments which recall specific incidents are noted in the space entitled "Evidence." Any standard marked "Needs Growth" requires the development of a growth plan. Any standard marked "Does Not Meet" requires the development of an individual corrective action plan. Evaluator may attach sheets if additional space is needed.

**Instructions:**

Answering these questions involves considerable and subjective decision-making. Information completed on this form should be gathered from specific products and behaviors such as observation, portfolios, extra-curricular activities, PD activities, etc. The entire document is intended to provide concrete data upon which a summative evaluation will be based. Items are checked "Exceeds," "Meets," "Needs Growth," or "Does Not Meet." Factual comments which recall specific incidents are noted in the space entitled "Evidence." Any standard marked "Needs Growth" requires the development of a growth plan. Any standard marked "Does Not Meet" requires the development of an individual corrective action plan. Evaluator may attach sheets if additional space is needed.

**Instructions:**

Answering these questions involves considerable and subjective decision-making. Information completed on this form should be gathered from specific products and behaviors such as observation, portfolios, extra-curricular activities, PD activities, etc. The entire document is intended to provide concrete data upon which a summative evaluation will be based. Items are checked "Exceeds," "Meets," "Needs Growth," or "Does Not Meet." Factual comments which recall specific incidents are noted in the space entitled "Evidence." Any standard marked "Needs Growth" requires the development of a growth plan. Any standard marked "Does Not Meet" requires the development of an individual corrective action plan. Evaluator may attach sheets if additional space is needed.

## APPENDIX A

### **16 KAR 1:020. Professional code of ethics for Kentucky school certified personnel.**

RELATES TO: KRS 161.028, 161.040, 161.120

STATUTORY AUTHORITY: KRS 161.028, 161.030

**NECESSITY, FUNCTION AND CONFORMITY:** KRS 161.028 requires that the Education Professional Standards Board develop a professional code of ethics. This administrative regulation establishes the code of ethics for Kentucky school certified personnel and establishes that violation of the code of ethics may be grounds for revocation or suspension of Kentucky certification for professional school personnel by the Education Professional Standards Board.

Section 1. Certified personnel in the Commonwealth:

- (1) Shall strive toward excellence, recognize the importance of the pursuit of truth, nurture democratic citizenship, and safeguard the freedom to learn and to teach;
- (2) Shall believe in the worth and dignity of each human being and in educational opportunities for all;
- (3) Shall strive to uphold the responsibilities of the education profession, including the following obligations to students, to parents, and to the education profession:

(a) To Students:

1. Shall provide students with professional education services in a nondiscriminatory manner and in consonance with accepted best practice known to the education;
2. Shall respect the constitutional rights of all students;
3. Shall take reasonable measures to protect the health, safety, and emotional well-being of students;
4. Shall not use professional relationships or authority with students for personal advantage;
5. Shall keep in confidence information about students which has been obtained in the course of professional service, unless disclosure serves professional purposes or is required by law;
6. Shall not knowingly make false or malicious statements about students or colleagues;
7. Shall refrain from subjecting students to embarrassment or disparagement; and
8. Shall not engage in any sexually related behavior with a student with or without consent, but shall maintain a professional approach with students. Sexually related behavior shall include such behaviors as sexual jokes; sexual remarks; sexual kidding or teasing; sexual innuendo; pressure for dates or sexual favors; inappropriate physical touching, kissing or grabbing; rape; threats of physical harm; and sexual assault.

(b) To parents:

1. Shall make reasonable effort to communicate to parents information which should be revealed in the interest of the student;
2. Shall endeavor to understand community cultures and diverse home environments of students;
3. Shall not knowingly distort or misrepresent facts concerning educational issues;
4. Shall distinguish between personal views and the views of the employing educational agency;
5. Shall not interfere in the exercise of political and citizenship rights and responsibilities of others;
6. Shall not use institutional privileges for private gain, for the promotion of political candidates, or for the partisan political activities; and
7. Shall not accept gratuities, gifts, or favors that might impair or appear to impair professional judgment, and shall not offer any of these to obtain special advantage.

(c ) To the education profession:

1. Shall exemplify behaviors which maintain the dignity and integrity of the profession;
2. Shall accord just and equitable treatment to all members of the profession in the exercise of their professional rights and responsibilities;
3. Shall keep in confidence information acquired about colleagues in the course of employment, unless disclosure serves professional purposes or is required by law;
4. Shall not use coercive means or give special treatment in order to influence professional decisions;
5. Shall apply for, accept, offer, or assign a position or responsibilities only on the basis of professional preparation and legal qualifications; and
6. Shall not knowingly falsify or misrepresent records of facts relating to the educator's own qualifications or those of other professionals.

Section 2. Violation of this administrative regulation may result in cause to initiate proceedings for revocation or suspension of Kentucky certification as provided in KRS 161.120 and 704 KAR 20:585. (21 Ky.R. 2344; eff. 5-4-95; recodified from 704 KAR 20:680, 7-2-202.)

## APPENDIX C

  - (j) Attainment of the teacher standards or the administrator standards as established by the Education Professional Standards Board that are not referenced in paragraphs (a) to (i) of this subsection.
- (3) The Certified employee evaluation programs shall contain the following provisions:
  - (a) Each certified school employee, including the superintendent, shall be evaluated by a system developed by the local school district and approved by the Kentucky Department of education.
  - (b) The local evaluation system shall include formative evaluation and summative evaluation.

1. “Formative evaluation” means a continuous cycle of collecting evaluation information and interacting and providing feedback with suggestions regarding the certified employee’s professional growth and performance.
  2. “Summative evaluation” means the summary of, and conclusions from, the evaluation data including formative evaluation data, that:
    - a. Occur at the end of an evaluation cycle; and
    - b. Include a conference between the evaluator and the evaluated certified employee, and a written evaluation report.
- (c) The Kentucky Board of Education shall adopt administrative regulations incorporating written guidelines for a local school district to follow in developing, implementing and revising the evaluation system and shall require the following:
1. All evaluations of certified employees below the level of the district superintendent shall be in writing on evaluation forms and under evaluation procedures developed by a committee composed of an equal number of teachers and administrators;
  2. The immediate supervisor of the certified school employee shall be designated as the primary evaluator. At the request of a teacher, observations by other teachers trained in the teacher’s content area or curriculum content specialists may be incorporated into the formative process for evaluating teachers;
  3. All monitoring or observation of performance of a certified school employee shall be conducted openly and with full knowledge of the employee;
  4. Evaluators shall be trained, tested and approved in accordance with administrative regulations adopted by the Kentucky Board of Education in the proper techniques for effectively evaluating certified school employees and in the use of the school district evaluation system;
  5. The evaluation system shall include a plan whereby the person evaluated is given assistance for professional growth as a teacher or administrator. The system shall also specify the processes to be used when corrective actions are necessary in relation to the performance of one’s assignment; and
  6. The training requirement for evaluators contained in subparagraph 4. Of this paragraph shall not apply to district Board of Education members.
- (4) A local district may request from the Kentucky Department of Education a waiver from the guidelines and administrative regulations promulgated by the Kentucky Board of Education as required in subsection (3)(c) of this section in order to implement an alternative evaluation plan for employees on continuing contracts. The department shall grant a waiver if the alternative plan provides for a three (3) phase certified employee evaluation plan that includes:

(a) Phase One: Evaluation for Professional Growth.

1. Evaluation is based on a wide array of relevant sources and directed toward general and specific recommendations for improvement; and
2. Evaluation does not include documentation that might adversely affect employment status.

(b) Phase Two: Transitions.

1. Evaluation is for the purpose of intensive scrutiny of job performance;
2. Evaluation includes documentation that may lead to adverse employment decisions;
3. Assistance and support for improvement shall be provided by the school district; and
4. Placement of an individual in the transition phase shall not be subject to appeal, but the employee shall be notified of the decision in writing.

(c) Phase Three: Evaluation for Deficiency.

1. Notwithstanding KRS 161.760, written notice of potential termination, reduction of direct classroom responsibility, or other adverse actions and conditions for job retention are given the employee;
2. A clear time frame for proposed actions is provided the employee; and
3. The summative evaluation is subject to appeal.

An alternative plan for the evaluation of certified personnel shall be proposed to the Kentucky Department of Education if the local district evaluation committee is in support of the plan. Training necessary to implement the alternative plan shall be provided to the principals, supervisory personnel, and the employees to be evaluated. The local district shall provide support to implement the plan. The department shall provide technical assistance to districts wishing to develop alternative evaluation plans.

- (5) The Kentucky Board of Education shall establish an appeals procedure for certified school employees who believe that local school district failed to properly implement the approved evaluation system. The appeals procedure shall not involve request from individual certified school employees for review.
- (6) The local Board of Education shall establish an evaluation appeals panel for certified personnel that consist of two (2) members elected by the certified employees of the district and one (1) member appointed by the Board of Education who is a certified employee of the board. Certified employees who think they were not fairly evaluated may submit an appeal to the panel for a timely review of their evaluation. In districts that have adopted an alternative evaluation plan under subsection (4) of this section, the appeal shall only apply to the summative evaluation of Phase Three.

- (7) Local school districts with an enrollment of sixty-five thousand (65,000) or more students shall have an evaluation system but shall be exempt from procedures or processes described in this section as long as the plan meets the standards established by the Kentucky Board of Education for local school district evaluation systems. The local plan shall include an appeals process for employees who believe they were not fairly evaluated.
- (8) Between July 15, 2000, and June 30, 2001, each school district shall review its local evaluation system to assure that the system is working effectively and to make changes to improve its system.
- (9) Beginning with the 2001-2002 school year, and in subsequent years, the Kentucky Department of Education shall annually provide for on-site visits by trained personnel to a minimum of fifteen (15) school districts to review and ensure appropriate implementation of the evaluation system by the local school district. The department shall provide technical assistance to local districts to eliminate deficiencies and to improve the effectiveness of their evaluation systems. The department may implement the requirement in this subsection in conjunction with other requirements, including, but not limited to, the scholastic audit process required by KRS 158.6455.

**Effective:** July 14, 2000

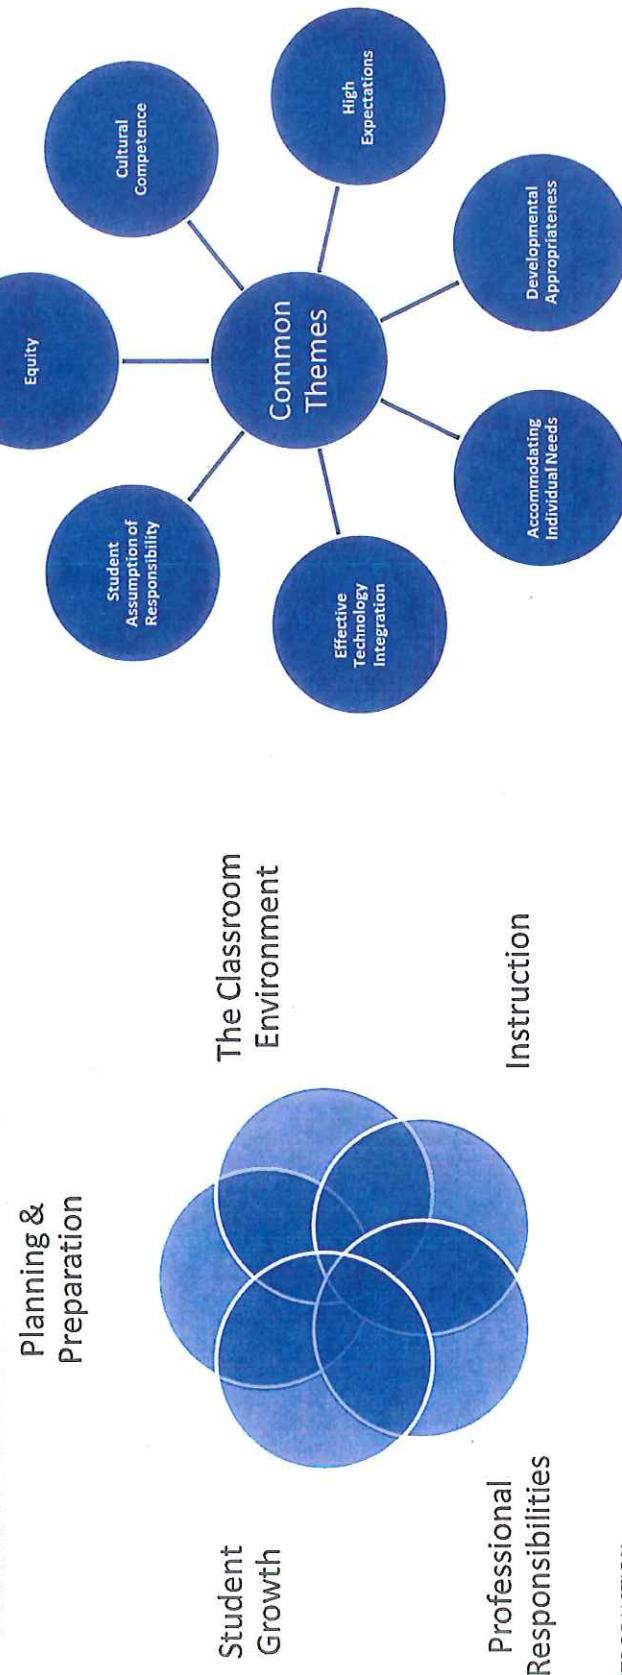

**History:** Created 2000 Ky. Acts ch. 527, sec. 4, effective July 14, 2000.

## **APPENDIX B**

- (d) If a hearing is granted, all involved parties shall have an opportunity to speak before the appeals panel.
- (e) Any briefs, written statements and/or other documents which a party wants considered by the State Evaluation Appeals Panel shall be filed with the panel and served on the opposing party at least ten (10) days prior to the scheduled hearing.
- (f) A decision of the appeals panel shall be rendered within fifteen (15) working days after a hearing.
- (g) A determination of non compliance shall render the evaluation void, and the employee shall have the right to be reevaluated. ## FRAMEWORK FOR TEACHING DOMAINS & COMMON THEMES:

### INTRODUCTION:

The *Framework for Teaching* organizes the multiple measures that comprise Kentucky's proposed Teacher Professional Growth and Effectiveness System. This framework is designed to support student achievement and professional best-practice through the domains of Planning and Preparation, Classroom Environment, Instruction, Professional Responsibilities, and Student Growth. The *Framework* also includes many themes that run throughout the document. These themes include ideas such as equity, cultural competence, high expectations, developmental appropriateness, accommodating individual needs, effective technology integration, and student assumption of responsibility. The Kentucky Teaching Standards, Kentucky Department of Education's Characteristics of Highly Effecting Teaching and Learning, along with research from many of the top educator appraisal specialists and researchers are the foundation for this system. The *Framework for Teaching* provides structure and feedback for continuous improvement through individual goals that target student and professional growth, thus supporting overall school improvement. Teacher performance will be rated for each component according to four performance levels: Ineffective, Developing, Accomplished, and Exemplary. It is important to know that the expected performance level is "Accomplished" which is bolded in the framework, but a good rule of thumb is that it is expected for a teacher to "live in Accomplished but occasionally visit Exemplary". Exemplary is purposefully designed to be difficult to achieve. The summative rating will be a holistic representation of performance combining data from multiple measures across each domain.

<b>1B - Demonstrating Knowledge of Students</b>	<p>Teachers don't teach content in the abstract; they teach it to students. In order to ensure student learning, therefore, teachers must know not only their subject content and its related pedagogy but the students to whom they wish to teach that content. In ensuring student learning, teachers must appreciate what recent research in cognitive psychology has confirmed; namely, that students learn through active intellectual engagement with content. While there are patterns in cognitive, social, and emotional developmental stages typical of different age groups, students learn in their individual ways and may come with gaps or misconceptions that the teacher needs to uncover in order to plan appropriate learning activities. In addition, students have lives beyond school, lives that include athletic and musical pursuits, activities in their neighborhoods, and family and cultural traditions. Students whose first language is not English, as well as students with other special needs, must be considered when planning lessons and identifying resources that will ensure their understanding.</p>	<ul style="list-style-type: none"> <li>Teacher demonstrates little or no understanding of how students learn and little knowledge of students' backgrounds, cultures, skills, language proficiency, interests, and special needs; and attains this knowledge about the class as a whole.</li> </ul>	<ul style="list-style-type: none"> <li>Teacher indicates the importance of understanding how students learn and the students' backgrounds, cultures, skills, language proficiency, interests, and special needs; and attains this knowledge from several sources of students' backgrounds, cultures, skills, language proficiency, interests, and special needs and attains this knowledge about groups of students.</li> </ul>	<ul style="list-style-type: none"> <li>Teacher actively seeks knowledge of students' levels of development and their backgrounds, cultures, skills, language proficiency, interests, and special needs from a variety of sources. <b>1C - Setting Instructional Outcomes</b>	<p>Teaching is a purposeful activity; even the most imaginative activities are directed towards certain desired learning. Therefore, establishing instructional outcomes entails identifying exactly what students will be expected to learn; the outcomes describe not what they will learn. The instructional outcomes should reflect important learning and must lend themselves to various forms of assessment so that all students are able to demonstrate their understanding of the content. Insofar as the outcomes determine the instructional activities, the resources used, their suitability for diverse learners, and the methods of assessment employed, they hold a central place in Domain 1.</p> <p>Learning outcomes are of a number of different types: factual and procedural knowledge, conceptual understanding, thinking and reasoning skills, and collaborative and communication strategies. In addition, some learning outcomes refer to dispositions; not only is it important for students to learn to read, but educators also hope that they will like to read. In addition, experienced teachers are able to link their learning outcomes with others both within their discipline and in other disciplines.</p>	<p><b>Ineffective</b></p> <ul style="list-style-type: none"> <li>Outcomes represent low expectations for students and lack of rigor, and not all of them reflect important learning in the discipline.</li> <li>Outcomes are stated as activities rather than as student learning.</li> <li>Outcomes reflect only one type of learning and only one discipline or strand and are suitable for only some students.</li> </ul> <p><b>Developing</b></p> <ul style="list-style-type: none"> <li>Outcomes represent moderately high expectations and rigor.</li> <li>Some outcomes reflect important learning in the discipline and consist of a combination of outcomes and activities.</li> <li>Outcomes reflect several types of learning, but teacher has made no attempt at coordination or integration.</li> <li>Most of the outcomes are suitable for most of the students in the class in accordance with global assessments of student learning.</li> </ul> <p><b>Accomplished</b></p> <ul style="list-style-type: none"> <li>Outcomes represent rigorous and important learning in the discipline.</li> <li>All the instructional outcomes are clear, are written in the form of student learning, and suggest viable methods of assessment.</li> <li>Outcomes reflect several different types of learning and opportunities for coordination.</li> <li>Outcomes take into account the varying needs of groups of students.</li> </ul> <p><b>Exemplary</b></p> <ul style="list-style-type: none"> <li>All outcomes represent rigorous and important learning in the discipline.</li> <li>The outcomes are clear, are written in the form of student learning, and permit viable methods of assessment.</li> <li>Outcomes reflect several different types of learning and, where appropriate, represent opportunities for both coordination and integration.</li> <li>Outcomes take into account the varying needs of individual students.</li> </ul>	<p>In addition to the characteristics of "accomplished":</p> <ul style="list-style-type: none"> <li>Teacher plans make reference to curricular frameworks or blueprints to ensure accurate sequencing.</li> <li>Teacher connects outcomes to previous and future learning.</li> <li>Outcomes are differentiated to encourage individual students to take educational risks.</li> </ul>

<b>1D - Demonstrating Knowledge of Resources</b>	<p>Student learning is enhanced by a teacher's skillful use of resources; some of these are provided by the school as "official" materials; others are secured by teachers through their own initiative. Resources fall into several different categories: those used in the classroom by students, those available beyond the classroom walls to enhance student learning, those for teachers to further their own professional knowledge and skill, and those that can provide non-instructional assistance to students. Teachers recognize the importance of discretion in the selection of resources, choosing those that align directly with the learning outcomes and that will be of most use to the students. Accomplished teachers also ensure that the selection of materials and resources is appropriately challenging for every student; texts, for example, are available at various reading levels to guarantee all students access to the content and successfully demonstrate understanding of the learning outcomes. Furthermore, expert teachers look beyond the school for resources to bring their subjects to life and to assist students who need help in both their academic and nonacademic lives.</p>	<p><b>Ineffective</b></p> <ul style="list-style-type: none"> <li>• Teacher is unaware of school or district resources for classroom use, for the expansion of his or her own knowledge, or for students.</li> </ul> <p><b>Critical Attributes</b></p> <ul style="list-style-type: none"> <li>• The teacher uses only district-provided materials, even when more variety would assist some students.</li> <li>• The teacher does not seek out resources available to expand his or her own skill.</li> <li>• Although aware of some student needs, the teacher does not inquire about possible resources.</li> </ul> <p><b>Possible Examples</b></p> <ul style="list-style-type: none"> <li>• For their unit on China, the students acquired all of their information from the district-supplied textbook.</li> <li>• Mr. J. is not sure how to teach fractions but doesn't know how he's expected to learn it by himself.</li> <li>• A student says, "It's too bad we can't go to the nature center when we're doing our unit on environment."</li> </ul>	<p><b>Developing</b></p> <ul style="list-style-type: none"> <li>• Teacher displays basic awareness of school or district resources available for classroom use, for the expansion of his or her own knowledge, and for students, but no knowledge of resources available more broadly.</li> </ul> <p><b>Accomplished</b></p> <ul style="list-style-type: none"> <li>• Teacher displays awareness of resources – not only through the school and district but also through sources external to the school and on the Internet – available for classroom use, for the expansion of his or her own knowledge, and for students.</li> </ul> <p><b>Exemplary</b></p> <ul style="list-style-type: none"> <li>• Teacher displays extensive knowledge of resources – not only through the school and district but also in the community, through professional organizations and universities, and on the Internet—for classroom use, for the expansion of his or her own knowledge, and for students.</li> </ul>

<b>1E - Designing Coherent Instruction</b>	Designing coherent instruction is the heart of planning, reflecting the teacher's knowledge of content and the students in the class, the intended outcomes of instruction, and the available resources. Such planning requires that educators have a clear understanding of the state, district, and school expectations for student learning, and the skill to translate these into a coherent plan. It also requires that teachers understand the characteristics of the students they teach and the active nature of student learning. Educators must determine how best to sequence instruction in a way that will advance student learning through the required content. It further requires the thoughtful construction of lessons that contain cognitively engaging learning activities, the incorporation of appropriate resources and materials, and the intentional grouping of students. Proficient practice in this component recognizes that a well-designed instruction plan addresses the learning needs of various groups of students; one size does not fit all. At the distinguished level the teacher plans instruction that takes into account the specific learning needs of each student and solicits ideas from students on how best to structure the learning.	<b>Accomplished</b>	<b>Exemplary</b>
<b>Instructional Groups</b>	<ul style="list-style-type: none"> <li>The series of learning experiences is poorly aligned with the instructional outcomes and does not represent coherent structure.</li> <li>The activities are not designed to engage students in active intellectual activity and have unrealistic time allocation.</li> <li>Instructional groups do not support the instructional outcomes and offer no variety.</li> </ul>	<ul style="list-style-type: none"> <li>Some of the learning activities and materials are suitable to the instructional outcomes and represent a moderate cognitive challenge but with no differentiation for different students.</li> <li>Instructional groups partially support the instructional outcomes, with an effort by the teacher at providing some variety.</li> <li>The lesson or unit has a recognizable structure; the progression of activities is uneven, with most time allocations reasonable.</li> </ul>	<ul style="list-style-type: none"> <li>Teacher coordinates knowledge of content, of students, and of resources, to design a series of learning experiences aligned to instructional outcomes and suitable to groups of students.</li> <li>The learning activities have reasonable time allocations; they represent significant cognitive challenge, with some differentiation for different groups of students.</li> <li>The lesson or unit has a clear structure, with appropriate and varied use of instructional groups.</li> </ul>

<b>1F - Designing Student Assessments</b>	<p>Good teaching requires both assessment of learning and assessment for learning. Assessments of learning ensure that teachers know that students have learned the intended outcomes. These assessments must be designed in such a manner that they provide evidence of the full range of learning outcomes; that is, to assess reasoning skills and factual knowledge, different methods are needed. Furthermore, such assessments may need to be adapted to the particular needs of individual students; an ESL student, for example, may need an alternative method of assessment to allow demonstration of understanding. Assessment for learning enables a teacher to incorporate assessments directly into the instructional processes, and to modify or adapt instruction as needed to ensure student understanding. Such assessments, although used during instruction, must be designed as part of the planning process. Such formative assessment strategies are ongoing and may be used by both teachers and students to monitor progress towards the understanding of the learning outcomes.</p>	<b>Ineffective</b>	<ul style="list-style-type: none"> <li>Assessment procedures are not congruent with instructional outcomes; the proposed approach contains no criteria or standards.</li> <li>Teacher has no plan to incorporate formative assessment in the lesson or unit nor any plan to use assessment results in designing future instruction.</li> <li>Teacher intends to use assessment results to plan for future instruction for the class as a whole.</li> </ul>	<b>Developing</b>	<ul style="list-style-type: none"> <li>Some of the instructional outcomes are assessed through the proposed approach, but others are not.</li> <li>Assessment criteria and standards have been developed, but they are not clear.</li> <li>Approach to the use of formative assessment is rudimentary, including only some of the instructional outcomes.</li> <li>Teacher intends to use assessment results to plan for future instruction for groups of students.</li> </ul>	<b>Accomplished</b>	<ul style="list-style-type: none"> <li>Teacher's plan for student assessment is aligned with the instructional outcomes; assessment methodologies may have been adapted for groups of students.</li> <li>Assessment criteria and standards are clear. <b>2B - Establishing a Culture for Learning</b>	<ul style="list-style-type: none"> <li>A "culture of learning" refers to the atmosphere in the classroom that reflects the educational importance of the work undertaken by both students and teacher. It describes the norms that govern the interactions among individuals about the activities and assignments, the value of hard work and perseverance, and the general tone of the class. The classroom is characterized by high cognitive energy and by a sense that what is happening there is important and that it is essential to get it right. There are high expectations for all students. 2C - Managing Classroom Procedures		A smoothly functioning classroom is a prerequisite to good instruction and high levels of student engagement. Teachers establish and monitor routines and procedure for the smooth operation of the classroom and the efficient use of time. Hallmarks of a well-managed operation of the classroom are that instructional groups are used effectively, noninstructional tasks are completed efficiently, and transitions between activities and management of materials and supplies are skillfully done in order to maintain momentum and maximize instructional time. The establishment of efficient routines, and success in teaching students to employ them, may be inferred from the sense that the class "runs itself".

2D - Managing Student Behavior		In order for students to be able to engage deeply with content, the classroom environment must be orderly; the atmosphere must feel businesslike and productive, without being authoritarian. In a productive classroom, standards of conduct are clear to students; they know what they are permitted to do and what they can expect of their classmates. Even when their behavior is being corrected, students feel respected; their dignity is not undermined. Skilled teachers regard positive student behavior not as an end in itself, but as a prerequisite to high levels of engagement in content.

3B - Questioning and Discussion Techniques	Developing	Accomplished	Exemplary
<ul style="list-style-type: none"> <li>Quality of Questions/Prompts</li> <li>Discussion Techniques</li> <li>Student Participation</li> </ul>	<p>Questioning and discussion are the only instructional strategies specifically referred to in the framework for teaching; this fact reflects their central importance to teachers' practices. But in the framework, it is important that questioning and discussion are used as techniques to deepen student understanding are being used rather than serving as recitation or a verbal quiz. Good teachers use divergent as well as convergent questions, framed in such a way that they invite students to formulate hypotheses, make connections, or challenge previously held views. Students' responses to questions are valued; effective teachers are especially adept at responding to and building upon student responses and making use of their ideas. High-quality questions encourage students to make connections among concepts or events previously believed to be unrelated, and arrive at new understandings of complex material. Effective teachers also pose questions for which they do not know the answers. Even when question has a limited number of correct responses, the question, being non-formulaic, is likely to promote thinking by students. Class discussions are animated, engaging all students in important issues and in using their own language to deepen and extend their understanding. These discussions may be based on questions formulated by the students themselves.</p> <p>Not all questions must be at a high level; that is, when exploring a topic, a teacher might begin with a series of questions of low cognitive level in order for a teacher's performance to be rated at a high level; that is, when everyone in the class is "on board." Furthermore, if the questions are at a high level, but only a few students participate in the discussion, the teacher's performance on the component cannot be judged to be at a high level. In addition, in lessons involving student in small-group work, the quality of the student's questions and discussion in their small groups may be considered part of this component. In order for students to formulate high-level questions, they must have learned how to do so. 3C Engaging Students in Learning	<p>Student engagement in learning is the centerpiece of the framework for teaching; all other components contribute to it. When students are engaged in learning, they are not merely “busy,” nor are they “on task.” The critical distinction between a classroom in which students are compliant and busy and one in which they are engaged is that in the latter students are developing their understanding through what they do. That is, they are engaged in discussing, debating, answering “what if?” questions, discovering patterns, and the like. They may be selecting their work from a range of (teacher-arranged) choices and making important contributions to the intellectual life of the class. Such activities don’t typically consume the entire lesson, but they are essential components of engagement.</p> <p>A lesson in which students are engaged usually has a discernible structure: a beginning, a middle, and an end, with scaffolding provided by the teacher or by the activities themselves. The teacher organizes student tasks to provide cognitive challenge and then encourages students to reflect on what they have done and what they have learned. This is, the lesson has closure, in which students derive the important learning from their own actions. A critical question for an observer in determining the degree of student engagement is, “What are the students being asked to do?” If the answer to that question is that they are filling in blanks on a worksheet or performing a rote procedure, they are unlikely to be cognitively engaged. In observing a lesson, it is essential not only to watch the teacher but also to pay close attention to the students and what they are doing. The best evidence for student engagement is what students are saying and doing as a consequence of what the teacher does, or has done, or has planned.</p>	<p><b>Ineffective</b></p> <ul style="list-style-type: none"> <li>The learning tasks and activities are partially aligned with the instructional outcomes but require only minimal thinking by students, allowing most to be passive or merely compliant.</li> <li>The pacing of the lesson may not provide students the time needed to be intellectually engaged.</li> <li>Few students are intellectually engaged or interested.</li> </ul>	<p><b>Developing</b></p> <ul style="list-style-type: none"> <li>The learning tasks and activities are aligned with instructional outcomes and designed to challenge student thinking, the result being that most students display active intellectual engagement with important and challenging content and are supported in that engagement by teacher scaffolding.</li> <li>The pacing of the lesson is appropriate, providing most students the time needed to be intellectually engaged.</li> </ul>	<p><b>Accomplished</b></p> <ul style="list-style-type: none"> <li>The learning tasks and activities are aligned with instructional outcomes and designed to challenge student thinking, the result being that most students display active intellectual engagement with important and challenging content and are supported in that engagement by teacher scaffolding.</li> <li>The pacing of the lesson provides students the time needed to intellectually engage with and reflect upon their learning and to consolidate their understanding.</li> <li>Students may have some choice in how they complete tasks and may serve as resources for one another.</li> </ul>	<p><b>Exemplary</b></p> <ul style="list-style-type: none"> <li>Virtually all students are intellectually engaged in challenging content through well-designed learning tasks and suitable scaffolding by the teacher, and fully aligned with the instructional outcomes.</li> <li>In addition, there is evidence of some student initiation of inquiry and of student contribution to the exploration of important content.</li> <li>The pacing of the lesson provides students the time needed to intellectually engage with and reflect upon their learning and to consolidate their understanding.</li> <li>Students may have some choice in how they complete tasks and may serve as resources for one another.</li> </ul>

<b>3D - Using Assessment in Instruction</b>	<p>Assessment of student learning plays an important role in instruction; no longer does it signal the end of instruction; it is now recognized to be an integral part of instruction. While assessment for learning has always been and will continue to be an important aspect of teaching (it's important for teachers to know whether students have learned what was intended), assessment has increasingly come to play an important role in classroom practice. And in order to assess student learning for the purposes of instruction, teachers must have their “fingers on the pulse” of a lesson, monitoring student understanding and, where appropriate, offering feedback to students. Of course, a teacher’s monitoring of student learning, though the action may superficially appear to be the same as that of monitoring student behavior, has a fundamentally different purpose in each case. When teachers are monitoring behavior, they are alert to students who may be passing notes, or bothering their neighbors; when teachers are monitoring student learning, they look carefully at what students are writing, or listen carefully to the questions students ask, in order to gauge whether they require additional activity or explanation in order to grasp the content. In each case, the teacher may be circulating in the room, but his/her purpose in doing so is quite different in the two situations. Similarly, on the surface, questions asked of students for the purpose of monitoring learning are fundamentally different from those used to build understanding; in the former, teachers are alert to students’ revealed misconceptions, whereas in the latter the questions are designed to explore relationships or deepen understanding. For the purpose of monitoring, many teachers create questions specifically to determine the extent of student understanding and use techniques (such as exit tickets) to ascertain the degree of understanding of every student in the class. Indeed, encouraging students (and actually teaching them the necessary skills) of monitoring their own learning against clear standards is demonstrated by teachers at high levels of performance.</p>

<b>3E - Demonstrating Flexibility and Responsiveness</b>	"Flexibility and responsiveness" refers to a teacher's skill in making adjustments in a lesson to respond to changing conditions. Shifting the approach in midstream is not always necessary; in fact, with experience comes skill in accurately predicting how a lesson will go and readiness for different possible scenarios. But even the most-skilled and best-prepared teachers will on occasion find that either a lesson is not going as they would like or that a teachable moment has presented itself. They are ready to respond to such situations. <b>4A - Reflecting on Teaching</b>	Reflecting on teaching encompasses the teacher's thinking that follows any instructional event – an analysis of the many decisions made both in planning and implementation of a lesson. By considering these elements in light of the impact they had on student learning, teachers can determine where to focus their efforts in making revisions and what aspects of the instruction they will continue in future lessons. Teachers may reflect on their practice through collegial conversations, journal writing, examining student work, informal observations and conversations with students, or simply thinking about their teaching. Reflecting with accuracy, specificity, and ability to use what has been learned in future teaching is a learned skill; mentors, coaches, and supervisors can help teachers acquire and develop the skill of reflecting on teaching through supportive and deep questioning. Over time, this way of thinking and analyzing instruction through the lens of student learning becomes a habit of mind, leading to improvement in teaching and learning.	<b>Exemplary</b>

<b>4B - Maintaining Accurate Records</b>		An essential responsibility of professional educators is keeping accurate records of both instructional and non-instructional events. This record keeping includes student completion of assignments, student progress in learning, and records of non-instructional activities that are part of the day-to-day functions in a school setting, including such things as the return of signed permission slips for a field trip and money for school pictures. Proficiency in this component is vital because these records inform interactions with students and parents and allow teachers to monitor learning and adjust instruction accordingly. The methods of keeping records vary as much as the type of information that is being recorded. For example, records of formal assessments may be recorded electronically with the use of spreadsheets and databases that allow for item analysis and individualized instruction. A less formal means of keeping track of student progress may include anecdotal notes that are kept in student folders.

<b>4C - Communicating with Families</b>	<p>Although the ability of families to participate in their child's learning varies widely due to other family or job obligations, it is the responsibility of teachers to provide opportunities for them to both understand the instructional program and their child's progress. Teachers establish relationships with families by communicating to them about both the instructional program and about individual students, and they invite families to be part of the educational process itself. The level of family participation and involvement tends to be greater at the elementary level when young children are just beginning school. However, the importance of regular communication with families of adolescence cannot be overstated. A teacher's effort to communicate with families conveys an essential caring on the part of the teacher, a quality valued by families of students of all ages.</p>

<b>4D - Participating in a Professional Community</b>	<p>Schools are, first of all, environments to promote the learning of students. But in promoting student learning, teachers must work with colleagues to share strategies, plan joint efforts, and plan for the success of individual students. Schools are, in other words, professional organizations for teachers—organizations whose full potential is realized only when teachers regard themselves as members of a professional community. This community is characterized by mutual support and respect and by recognition of the responsibility of all teachers to be constantly seeking ways to improve their practice and to contribute to the life of the school. Inevitably, teachers' duties extend beyond the doors of their classrooms and include activities related to the entire school and/or larger district. These activities include such things as school and district curriculum committees or engagement with the parent-teacher organization. With experience, teachers assume leadership roles in these activities.</p>	<p><b>Ineffective</b></p> <ul style="list-style-type: none"> <li>Teacher's relationships with colleagues are negative or self-serving.</li> <li>Teacher avoids participation in a professional culture of inquiry, resisting opportunities to become involved.</li> <li>Teacher avoids becoming involved in school events or school and district projects</li> </ul>	<p><b>Developing</b></p> <ul style="list-style-type: none"> <li>Teacher maintains cordial relationships with colleagues to fulfill duties that the school or district requires.</li> <li>Teacher becomes involved in the school's culture of professional inquiry when invited to do so.</li> <li>Teacher participates in school events and school and district projects when specifically asked to do so.</li> </ul>	<p><b>Accomplished</b></p> <ul style="list-style-type: none"> <li>Teacher's relationships with colleagues are characterized by mutual support and cooperation; teacher actively participates in a culture of professional inquiry.</li> <li>Teacher volunteers to participate in school events and in school and district projects, making a substantial contribution.</li> </ul>	<p><b>Exemplary</b></p> <ul style="list-style-type: none"> <li>Teacher's relationships with colleagues are characterized by mutual support and cooperation; teacher taking initiative in assuming leadership among the faculty.</li> <li>Teacher takes a leadership role in promoting a culture of professional inquiry.</li> <li>Teacher volunteers to participate in school events and district projects making a substantial contribution, and assuming a leadership role in at least one aspect of school or district life.</li> </ul>

<b>4E - Growing and Developing Professionally</b>	As in other professions, the complexity of teaching requires continued growth and development in order to remain current. Conscientiousness about continuing to stay informed and increasing their skills allows teachers to become ever more effective and to exercise leadership among their colleagues. The academic disciplines themselves evolve, and educators constantly refine their understanding of how to engage students in learning; thus growth in content, pedagogy, and information technology are essential to good teaching. Networking with colleagues through such activities such as joint planning, study groups, and lesson study provides opportunities for teachers to learn from one another. These activities allow for job-embedded professional development. In addition, professional educators increase their effectiveness in the classroom by belonging to professional organizations, reading professional journals, attending educational conferences, and taking university classes. As they gain experience and expertise, educators find ways to contribute to their colleagues and to the profession.	<b>Ineffective</b>	<b>Developing</b>	<b>Accomplished</b>	<b>Exemplary</b>

5A – Student Growth		The teacher contributes to the overall success of the school and the academic growth of each student, regardless of demographics (e.g., socioeconomic status, ethnicity, gender, disability, prior achievement). We know that teachers have a definite and powerful impact on student learning and academic performance. One approach to linking student growth to teacher performance involves building the capacity for teachers and their supervisors to interpret and use student data to set goals for student growth. The intent of monitoring student growth is to make explicit the connection between teaching and learning, make instructional decisions based on student data, provide a tool for school improvement, increase effectiveness of instruction through continuous professional growth, focus attention on student growth, and ultimately, increase student achievement.
