### **Spencer County School Fiber Maintenance Agreement**

Maintenance Agreement for Fiber Plant in Spencer County includes a quarterly ride-out to check for the following items:

- Loose lashing wire
- Tree trimming
- Pole changes
- General condition of fiber plant
- General condition of splice enclosures

All repairs need to be performed on a regular basis. Repairs needed due to auto accidents, trees fallen across the fiber line, gun shots, etc will be covered per this agreement as well as the labor and materials. This Maintenance Agreement only covers the outside fiber optic plant and for only three (3) spans of fiber optic cable per occurrence. Spencer County Board of Education should purchase insurance to cover all other major occurrences such as a major ice/snow storm, tornado, or other disaster that would affect a major part of the fiber optic plant that would not be covered under this agreement.

Total cost: \$7,500 per year. May be payable in monthly, quarterly, or yearly payments. The cost may change based upon possible future additions to the plant or material cost. If there are any price changes, you will receive a written notice in advance.

If you have any questions or concerns, you may contact us via phone or email.
