

# Henderson CTE News Release

Students from Henderson County High School CTE participated in the summer Kentucky Association of Career & Technical Education (CTE) summer Teachers Conference. The students were given the goal of incorporating social media throughout the conference. They achieved this goal by creating an Instagram, Twitter and Facebook for KACTE as well as videos to go along with each social media. The students ran a booth while at the conference, helping set up scanners on both phones and tablets in order to insure social media could be fully used while there. The Henderson Social Media Team was introduced by CTE student Mr. Phillip Johnson to the Kentucky CTE Educators at the open General session. He did an outstanding job describing each of the Social Media functions. Throughout the conference Mr. Doty and Mr. Bailey heard very positive compliments such as; they are professional, knowledgeable, detailed, helpful and they helped me with my I-pad.
