VEHICLE # 7014 V.I.N. 1B7GH14R7NX256527
1992 Dodge Caravan

This vehicle had the air conditioner compressor seize. The belt overheated & caught fire. It melted the wiring under the hood and the coolant recovery tank. It also caused the engine to overheat.
This damage would cost more to repair than the vehicle is worth. I am recommending it be add to surplus.
