

McDonald's MAC Grants

Program Description

Applications accepted until September 30, 2015

Teachers,

For the thirteenth consecutive year, Kentuckiana-area middle school teachers have the opportunity to “Make Activities Count” in the classroom through the McDonald’s Restaurants of Kentuckiana MAC Grant program, which rewards teachers for innovation and creativity in the classroom by providing funding for hands-on classroom activities.

The MAC Grant program provides up to \$500 to inspired middle school teachers interested in creating meaningful and interactive educational projects for sixth, seventh and eighth grade students. Project ideas are endless and limited only by the teacher’s creativity.

Grant recipients will be notified by November 30, 2015.

Eligibility

Please read this before you proceed.

This program is for sixth through eighth grade teachers in the Kentuckiana area

Only complete applications with itemized budgets will be accepted

All activities must take place on school property

All applications must be submitted by September 30, 2015

MAC Grants program is now accepting applications
until **September 30, 2015**

It is with great sadness that our school no longer offers an Art history or Art studio class. With declined enrollment, staffing the position became a harsh reality in tight budgets. As the school's library media specialist and the teacher lead for a new photography club, I am hoping to open up the world artistically, through photographs, pictures, and snapshots. Many students have access to standard cameras, as well as cameras on their cell devices. I would like to use this money to purchase 5 digital cameras to use specifically during club time, but not limited to that time in any way. I'd like to 'check out' the cameras overnight, much like a book check out. Our photography club will sponsor photo contests, take pictures to be used in our school's yearbook, take photos to upload to our school's webpage and Facebook page. Hopefully students can feel success (and possibly discover a new passion or talent with an eye for capturing life.) We would be preserving history! I will tie in great books (how-to, fiction with great 'picture related 'themes') and invite guest speakers to share their talents. Again, my sincere hope is to expose (pun intended) students to a whole new world, viewing it through the lens of a camera.
