

To Whom it May Concern:

My recommendation for the competition flooring would be a hardwood floor, with a Marley rolled out on top. If that is possible, that would be the best option for our dancers and the skills/tricks they are executing in their routines these days. If we have a hardwood or gym floor, we could also do just that without the Marley. Anything that is not a 100% smooth surface would not be suitable for our dancers. Given the types of skills/tricks they are doing in their routines these days, the smoother surface is a safer option for our dancers.
