EPL, (E-line): Secure, High-Speed Connectivity Between Two Locations

EPL: Ethernet Private Line Overview (E-Line)

For businesses with two locations, Ethernet Private Line (EPL) is a cost-effective, high-capacity business Ethernet solution. EPL reliably connects Customer Premises Equipment (CPE) with a lower-cost User-to-Network Interface (UNI), making it a smart replacement for traditional TDM private line service.

EPL can instantly and privately transmit mission-critical data at speeds from 5 Mbps to 10 Gbps. And Ethernet Private Line dedicated point-to-point connectivity supports metro and national business applications including online backup, storage area networking, and data center connectivity.

EPL Product Highlights (E-Line)

755 East Main Street
Lebanon, Kentucky 40033
