

Maintenance Department

The Maintenance Department is responsible for the maintenance of all buildings and grounds owned by the Board of Education. Our goal is to provide our students and staff with a safe, well-maintained school/facility.

Maintenance Department consist of Co – Directors Billy Austill and Don Thacker 14 technicians with a wide range of knowledge and expertise, 2 Office support staff.

Currently the Maintenance Department maintain 1.2 million square feet in facilities and 321 acres.

Last year the department completed 3,181 work orders.

Work orders are classified with high, medium and low priorities. In case of an emergency we would receive a call for immediate response. This allows schools to put in work orders and the jobs that need immediate attention receive the high priority.

Work orders also vary in how many man hours they will require. A work order may be put in for the year requiring as much as 520 hours

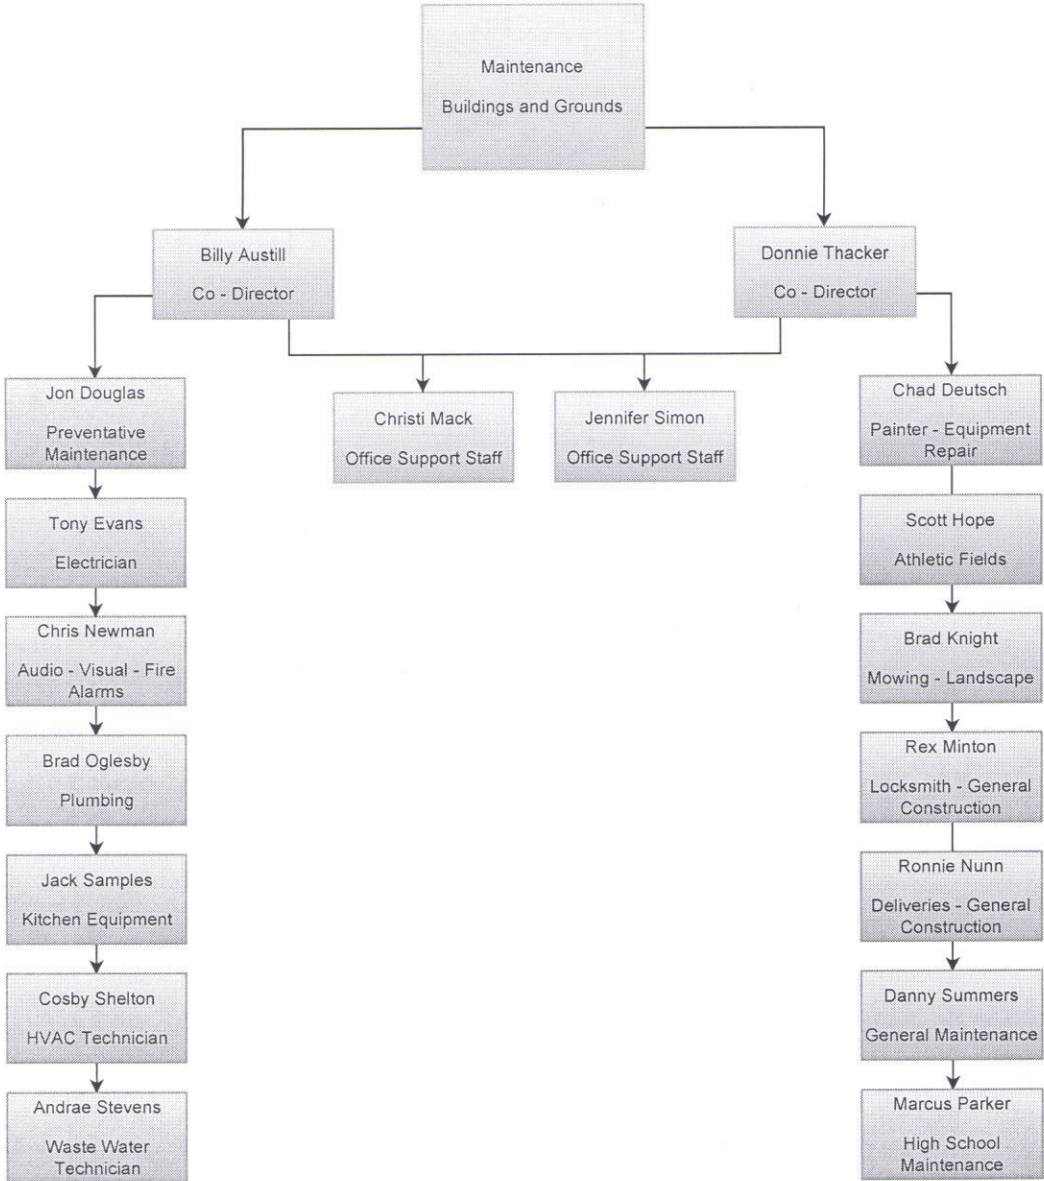

Or

A work order may only take one hour of the technician's time.

Co- Directors are available to be reached 24/7 – So if emergencies arise they can be addressed in a timely manner and appropriate technicians can be called if needed.

The Maintenance Department currently has a total of 18 vehicles. 7 of the vehicles are 20 plus years old.

In last 2 years - 1 dump truck, and 4 service trucks have been removed from the service fleet by the Transportation Department due to age and cost of up keep. Dependable vehicles allow our technicians have appropriate tools and parts to get to job sites and complete them in a timely manner.
