Itchy mouth

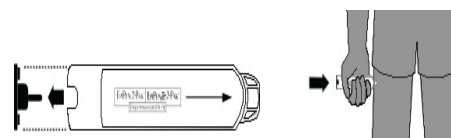

SKIN

A few hives,
mild itch

GUT

Mild nausea/
discomfort

GIVE EPINEPHRINE IMMEDIATELY!

- A. For students with a documented risk of anaphylaxis, refer to current Asthma/ Allergy Primary Care Provider Authorization (PCP) form for specific instructions.
- B. For individuals without specific orders on file:
 1. Direct someone to call 911 to request immediate medical assistance. Advise the 911 operator that anaphylaxis is suspected and that epinephrine is being given. **
 2. Determine proper dose of epinephrine. Doses for epinephrine auto injection:
 - Early Childhood/Kindergarten: **Junior** Epinephrine Auto Injector (0.15mg)
 - Grades 1 and above: Epinephrine Auto Injector (0.30mg)
 3. Remove the blue safety cap and inject epinephrine immediately into the outside of mid-thigh (through clothing if necessary avoiding seams/pockets), press firmly and hold in place for 10 seconds. Note the time the epinephrine is given.
 4. Monitor airway and breathing. Remain with person and reassure them as needed. Notify staff trained in CPR.
 5. **If no improvement or if symptoms worsen in 5 minutes**, administer a second dose of epinephrine if available. (Repeat step 3)
 6. Document all events on the Stock Epinephrine Response Form. Provide the used auto injector to EMS personnel.
 7. Individual must be transported to nearest hospital for evaluation and monitoring. A delayed or secondary reaction may occur up to several hours later. Student may not return to school for the remainder of the day.

Others to be notified: Parent/guardian, building administrator, and JCPS Health Services
