

Kentucky's digital and future ready students and teachers

We are headed towards greater and more meaningful digital interactions between family, school, and community. We believe digital and future ready foundations can:

- help empower student personalized learning experiences and preparedness for college and workforce
- increase teacher productivity and digital workflows
- enhance communications and invaluable collaboration models
- expand data enhanced decision making
- and, provide a robust infrastructure for endless possibilities.

Access

Student access at school and at home helps us understand how "plugged in" learners are during the school day. Students without access to technology in school are less likely to engage in 21st century learning. Ease of access is a precursor to shifts in student outcomes.

88% students have Internet access at home. Of whom, 94% have wireless Internet access.

- 89 Districts with BYOD only - 51% (73% total)
- 17 Districts with 1:1 only - 9% (31% total)
- 38 Districts with both BYOD and 1:1 - 22%
- 31 Districts without BYOD or 1:1 - 18%

100kbps

Bandwidth per student available through statewide fiber network service

623,513

Avg Daily Attendance

376,187

Student Instructional Devices

100% of schools provide Wifi access to students

Of these, 69% of schools have implemented dense Wifi networks capable of supporting BYOD or 1:1 initiatives

Future Ready Student

Strong online skills, such as confidence using shared digital workspaces, have been correlated with increased collaboration in the classroom.

Students can think about concepts and interactions in more varied ways with the affordances of multimedia and multimodal representations.

MULTIMEDIA SKILLS

Student reported ease of editing a photo

13% reported never doing so

Student reported ease of uploading photos from a camera or phone

18% (-5%) reported never doing so

Student reported ease of recording and editing video

11% (-1%) said the task was impossible

Student reported frequency of playing a game on a computer or phone

4% (-1%) reported never doing so

FOUNDATIONAL SKILLS

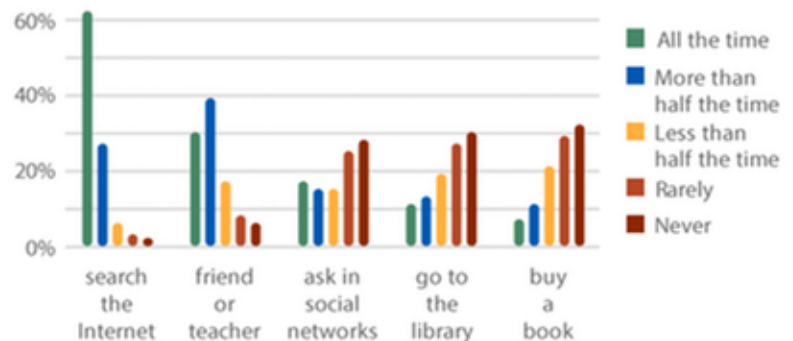

Student reported ease of sending an email

4% (-1%) said the task was impossible

Student reported research methods

Students who have access to computers and the Internet are more likely to use technology more frequently and have better technology skills. These skills are a precursor to the use of digital creativity, digital collaboration, digital communication, and critical thinking in the classroom and while learning.

Students can also personalize the use of their technology and leverage greater access to engage in anytime, anywhere learning on topics of their choice.

< KY IMAGINE ACADEMY >

21st Century Teacher

KY teachers are cited as a top 3 state in accessing and using quality data to raise achievement for all students (Data Quality Campaign)

Teachers with strong foundational skills are able to handle administrative classroom tasks easily, including attendance and grading. Further, teachers who are confident in their ability to use foundational skills are often able to use these skills when learning new online and multimedia skills.

MULTIMEDIA SKILLS

Ability to manipulate photos and record and edit audio or video

49% expressed interest in PD in this area

of KY teachers believe technology enhances learning and their daily lives

4 of 5 teachers report having sufficient access to instructional technology...

yet less than 2 in 5 have access to an integration specialist or digital learning coach.

ONLINE SKILLS

Essential skills for contributing to and collaborating on the Internet

15% expressed interest in PD in this area

FOUNDATIONAL SKILLS

Basic computing skills - sending email and creating spreadsheets

17% expressed interest in PD in this area

Teacher-reported hours spent per year participating in school-sponsored technology related PD

Most requested education technology PD topics
