344-3360

- We have three undergraduate teacher candidates and one MAT teacher candidate in the field for the spring semester. Thank you for your support.
- We will be looking for practicum placements and mentor placements for both programs for the spring. Jo Craven will be contacting you at the district and building level for placements. Please keep your doors open for supervising opportunities.
- In order to reach the demands of the growing adult population, President Armstrong has required all adult learning courses to be available in an online forum by the summer at Thomas More. Many MAT courses and the MEd program in the Education Department will be offered online as of this summer. We will be sending information about how prospective students can enroll.
