

JCPS Behavior Support Systems

Commitment Form for Principals and SBDM Councils/Instructional Leadership Teams

As principal, I understand that I will participate in the Behavior Support Systems cohort and will commit to the identified Restorative Practice (RP) trainings. I agree to identify and organize a School-Based Behavior Support Systems team. I will provide instructional leadership and monitoring to ensure fidelity of implementation during and after completion of the cohort.

As principal, I will ensure that the Behavior Support System team holds at least one meeting a month. I will ensure that the school-based lead/co-lead, and/or a team member to attend Behavior Support System trainings monthly. I am aware the trainings will be designed to assist in the implementation of the integrated systems including Restorative Practices, Positive Behavior Interventions and Supports, and the Danielson framework as outlined in the Professional Growth and Effectiveness system.

As principal, I agree to continue to implement and refine the school-based PBIS framework. I will work to ensure that students, staff, and the school community understand the integrated model and how each part amalgamates to make a collaborative whole.

As a principal, I have explained the expectations and requirements of the cohort to my school community including, but not limited to administrators, teachers, assistants, clerical staff, etc. The school community are committed to the efforts and building capacity within the school.

My School-Based Decision Making (SBDM) Council has read and understands the two-year plan and, if we move forward, will support the full implementation of the integrated Behavior Support Systems model in our school during and after completion of the project. In the absence of an SBDM Council, the Instructional Leadership Team (ILT) can commit to this work.

As a school, if we are selected to participate in the cohort 2016-17 school year, we will implement this program with fidelity during and after completion of the project.
