C. Provide a complete narrative of the proposed project. Districtwide technology infrastructure improvements

Install new network switches, and wireless access points in each district location along with performing an upgrade of the districts core network router. This project will provide a more robust experience for students and staff as there is a continued increase in demand on the current network infrastructure. The infrastructure upgrades will support the districts long term vision of providing a reliable data network infrastructure for all of the systems that rely upon it including but not limited to all 1:1 mobile computing devices, telecommunications, security and access control systems, and the delivery of daily instruction. The project will include an upgrade of all network switches, 352 wireless access points, and an upgrade to the central office core router.
