

I, Donna Hargens, am an authorized representative of Jefferson County Public Schools ("Owner"), which owns properties and buildings located:

- ☐ Nationally, across the United States
☐ Regionally, throughout _____
☒ As indicated on the attached property list (see page 2)

SST, Inc. is the owner and manufacturer of sensor equipment that is used as part of an alarm system which will contribute to neighborhood safety. The electronic sensor is a small tan sized container, to be mounted in an "out of sight" fashion on the rooftop and will be connected to a network via a cellular data modem. The equipment uses less than 3 total watts of power.. SST, Inc. has found that Owner's properties are often good locations to place a sensor to assist local public safety.

SST, Inc. will keep private the fact of the emplaced sensor, and we understand that this is law enforcement sensitive information and cannot be disclosed under any circumstances.

I hereby grant SST, Inc., and its agents, employees and contractors, permission to place a sensor on any of Owner's properties, as identified above, and to enter on to those properties at reasonable times and with reasonable notice for purposes of installing and maintaining the sensor, and for the use of electricity, with no cost associated to SST or the Public Safety agency. My signature below certifies that I have the legal authority to give this permission.

If we wish to revoke this permission, I must give 60 days notice to SST, Inc. by notifying **support@shotspotter.com**. As long as the sensor is on the property we will take reasonable care to protect it and the electrical line, and will advise SST, Inc. if it is known to become damaged. Under no circumstances will we consider the sensor to be a fixed feature on the property – the sensor will always be owned and maintained by SST, Inc.

SST, Inc. shall indemnify and hold harmless the owner for injuries to persons and damage to property, to the extent caused by negligent acts or omissions in the installation, placement, and/or maintenance of the sensor by SST, Inc. employees or contractors, and SST, Inc. shall defend claims or suits by third parties against the owner for such injuries or damage, to the extent caused by negligent acts or omissions in the installation, placement, and/or maintenance of the sensor by SST, Inc. employees or contractors. Provided, however, that SST's total aggregate liability to indemnify, hold harmless and defend the owner under this provision shall be limited to, and in no event shall exceed, the amount of ShotSpotter's liability insurance coverage for such injuries, damage and liabilities.
