Subject: Personnel Request

Mr. Kenner,

North Todd has had 10 new students who require special education services enroll so far this year. Current staffing is not adequate to meet the service minutes on these students' IEPs. I am requesting that an additional instructional assistant position be added at North Todd to meet the educational needs of these students.

Additionally, Todd County Middle School is beginning to receive more students with significant needs. They are also in need of an additional instructional assistant to help with feeding, changing, and providing educational services to these students. Thank you for your consideration.
