

**Curriculum, Instruction, and Assessment
Board Agenda
Wednesday, October 25, 2017**

PROFESSIONAL DEVELOPMENT

- We are having a data day for each school building this year. The HS Data Day was on Monday, October 17 and LES Data Day is on November 1. During this Data Day, we are reviewing the new Accountability Model, each school's recently released KPREP data and trend data over the last few years, and individual student data.
- For our first PL day in November, a focus will be on analyzing KPREP data and creating the CSIP/CDIP.

ASSESSMENT

- We recently received our KPREP data. That data will be shared during this meeting.
- Teachers have been discussing classroom assessment data at Flashback meetings at LES and PLC meetings at DHS.
- Students at the HS recently took the CERT assessment and students have been placed in appropriate interventions.

CURRICULUM/INSTRUCTION

- CIITS will no longer be accessible beginning in December. As a district, we will be utilizing OneDrive for teachers to upload the Self-Reflection, Professional Growth Plans, Student Growth Goals, and Teacher Evaluations.
- The focus of Early Release Meetings this year have been three fold: School Driven Activities in which building level principals determine the activities taking place, District Wide Summative Assessment Analysis in which teachers are analyzing summative assessment data, and the District Wide Book Study in which we are reviewing Eric Jensen's book, Poor Students, Richer Teaching.
- We have been conducting "Deeper Dive" Walkthroughs in every grade level and content area. We have completed seven walkthroughs and have seven walkthroughs remaining.

NEW TEACHERS

- During our third New Teacher Meeting, Angie Buschle attended the meeting and shared her expertise in providing Accommodations and meeting the needs of all students.
