RE: Suggested Changes to the Archery Format

After considering the Board's recent action, it is my feeling that we should recommend the following changes to format in scoring and team size for this year's postseason competition.

Several factors were taken into consideration in our discussions including the addition of a girls' team championship, average school gender participation numbers, venue, and the request of the Board to stay within the one-day event parameters.

- 1) KHSAA will sponsor both boys and girls competitions for both team and individuals.
- 2) All entrants shall come from the KHSAA online postseason roster.
- 3) The girls' tournament (both team and individuals) is limited to female archers only.
- 4) The boys' team tournament may include male and female archers.
- 5) The team size for each event will be 7 to 12 archers.
- 6) A school may enter less than 7 and compete as individuals, however a school entering a team may not enter additional competitors as individuals in the same tournament.
- 7) The team score for the region and state tournament shall be the best seven scores from those entered.
- 8) Females from schools without enough for a girls team may compete as individuals on the boys' team
- 9) A female may be entered in the region as either an individual or on a team, but not both, and that decision is binding for both region and state.
