Facilities, Transportation, and Newport Regional School Report

Transportation:

- All of our buses are currently operating. We have one bus that will go out for some minor repairs in the near future.
- We are currently finishing up basketball, wrestling, cheerleading, etc... so we should have fewer trips for a short time.

Facilities:

- Punch list to address some small issues has been completed. Entry way will be finished over Spring Break or sooner depending upon weather, etc....
- HVAC on the 5th floor is nearing completion. KLH is running final checks.
- Combi Ovens have finally been installed.
- 5 New doors have been installed at NIS over the break.
- The recent rains have revealed several more leaks in the Welcome Center and we are currently trying to address this issue.
- Newport Stadium has a small sink-hole which we are currently trying to address. The recent rain has made this difficult to complete but should be addressed next week by the company.
- Recent rains have flooded the football field. However, all of this water was from street runoff and was not sewage. Therefore, we are faced with less of a situation than we had last time. Company will determine if additional rubber will be required to meet the standards required.
- Have met with both the bleacher and flooring company's to determine cost of replacing the gym floor and the bleachers. Both will be sending in quotes in the next couple of weeks.
- Also, looking at remodeling locker rooms in both the high school and the stadium. Most of this would consist of painting, repairing or replacing showerheads, etc...

Newport Regional School

- Student numbers have increased slightly at the facility over the last couple of weeks.
- Preparations are underway to give the ACT, End of Course, and KPREP. Trainings will be conducted with the staff as needed during this time.
