Describe the purpose/intent of the grant. Include the grant funding source. How long will the grant be in force?

The Welborn Foundation grant funds will be used to implement a research project to determine the language development of a targeted group of about 20 children. This is a two year grant.

Describe the components/work/salary/materials the grant will pay for. What is the time frame of the grant? Be specific.

Grant funds will be used to provide salaries for project staff and be used to purchase the Daily Language Processor equipment and materials needed to track the verbal interactions of the identified child and the adults in their lives to help determine the developmental level of their vocabulary prior to entering school. Children need to hear approximately 21,000 words per day for their vocabularies to develop at an appropriate pace. However, research has shown that children growing up in less affluent homes hear significantly fewer words each day than their peers in middle and high-income families. The "word gap" has significant impact on their achievement levels and readiness for school.

Research findings will be shared to help reinforce the need for parents to talk with their child and to read to them daily to help in their vocabulary development.

What components/work/salary/materials will the grant not pay for that will be necessary for the district to incur? Be specific.

The grant will provide all needed funding for this research project.

How will the grant be sustained? List potential ideas for the sustainability of the grant initiatives.

This is a two-year research grant to determine language interactions of Henderson children.
