In 2017-2018 CHHS SBDM focused on teacher development in the areas of Standards Based Grading (SBG) and Kagan type instructional strategies.

Professional development in both areas has been provided for two consecutive years. The faculty has had introductions to both, along with other opportunities throughout the school year. A team of lead teachers who have begun to embrace SBG, visited a school that has fully implemented SBG across the school. Multiple teachers have implemented Kagan strategies in their classrooms.

Groups of teachers are leading more professional development on both topics in 2017-2018 professional development. In classrooms where these have been implemented, a vast increase in student performance has been observed. Based on feedback from teachers and data analysis, the CHHS SBDM plans to continue supporting development in these areas.
