Kentucky Academic Standards Reading and Writing

INTRODUCTION

Background

Preparation of Kentucky's students for the demands of the 21st Century requires districts and schools to prepare every student for successful transition to post-secondary education, work and the community. The *Kentucky Academic Standards for Reading and Writing* help ensure all students throughout Kentucky are provided with common content and have opportunities to learn at high levels. Students need vast literacy abilities and ever-changing technological competencies. This broadened definition of literacy means English/language arts education must address many different types and uses of language. The instructional programs for Kentucky's public schools emphasize the development of students' abilities to acquire, apply and integrate knowledge, skills and understandings in real life contexts and to problem-solve, make decisions and think critically and creatively. They assist students in connecting learning to the world beyond the classroom by exploring and investigating real issues and problems of communities, states, the nation and the world. Well-designed Reading and Writing standards, curriculum and instruction recognizes the diversity of students and how children learn, construct knowledge and acquire skills and concepts of the disciplines.

Kentucky's Vision for Students

English/language arts education develops skills, knowledge and dispositions (e.g. content, comprehension and analysis) that directly align with the Kentucky Board of Education's (KBE) vision that each and every student is empowered and equipped to pursue a successful future. To equip and empower students, the following capacity and goal statements frame instructional programs in Kentucky schools. They were established by the Kentucky Education Reform Act (KERA) of 1990, as found in Kentucky Revised Statute (KRS) 158.645 and KRS 158.6451. All students shall have the opportunity to acquire the following capacities and learning goals:

- Communication skills necessary to function in a complex and changing civilization;
- Knowledge to make economic, social and political choices;
- Understanding of governmental processes as they affect the community, the state and the nation;
- Sufficient self-knowledge and knowledge of their mental health and physical wellness;
- Sufficient grounding in the arts to enable each student to appreciate their cultural and historical heritage;
- Sufficient preparation to choose and pursue their life's work intelligently; and
- Skills to enable students to compete favorably with students in other states and other parts of the world

Furthermore, schools shall:

- Expect a high level of achievement from all students
- Develop their students' abilities to:
- Use basic communication and mathematics skills for purposes and situations they will encounter throughout their lives;

- Apply core concepts and principles from mathematics, science, arts and humanities, social studies, English/language arts, health, mathematics, practical living, including physical education, to situations they will encounter throughout their lives;
- Become self-sufficient individuals;
- Become responsible members of a family, work group or community as well as an effective participant in community service;
- Think and solve problems in school situations and in a variety of situations they will encounter in life;
- Connect and integrate experiences and new knowledge from all subject matter fields with what students have previously learned and build on past learning experiences to acquire new information through various media sources
- Increase student attendance rates;
- Reduce dropout and retention rates;
- Reduce physical and mental health barriers to learning; and
- Be measured on the proportion of students who make a successful transition to work, postsecondary education and the military.

To ensure legal requirements of English/language arts classes are met, the Kentucky Department of Education (KDE) encourages schools to use the *Model Curriculum Framework* to inform development of curricula related to these courses. The *Model Curriculum Framework* encourages putting the student at the center of planning to ensure that:

...the goal of such a curriculum is to produce students that are ethical citizens in a democratic global society and to help them become self-sufficient individuals who are prepared to succeed in an ever-changing and diverse world. Design and implementation requires professionals to accommodate the needs of each student and focus on supporting the development of the whole child so that all students have equitable access to opportunities and support for maximum academic, emotional, social and physical development.

(Model Curriculum Framework, page 19)

Legal Basis

The following Kentucky Revised Statutes (KRS) and Kentucky Administrative Regulations (KAR) provide a legal base for this publication: KRS 156:160

KRS 156.160 Promulgation of administrative regulations by the Kentucky Board of Education

With the advice of the Local Superintendents Advisory Council (LSAC), the KBE shall promulgate administrative regulations establishing standards that public school districts shall meet in student, program, service and operational performance. These regulations shall comply with the expected outcomes for students and schools set forth in KRS 158:6451.

704 KAR 3:305 Minimum high school graduation requirements

This administrative regulation establishes the minimum high school graduation requirements necessary for entitlement to a public high school diploma, including the requirements for the graduating class of 2012 .

704 KAR 8:020 Reading and Writing Standards

This administrative regulation adopts into law the Reading and Writing Standards.

Senate Bill 1 (2017) Required Revision of Academic Standards

Beginning in 2017-18 and every six years thereafter, the KBE shall implement a process for reviewing Kentucky's academic standards and the alignment of corresponding assessments for possible revision or replacement to ensure alignment with postsecondary readiness standards necessary for global competitiveness.

Standards Creation Process

The standards creation process focused heavily on educator involvement. Kentucky teachers understood elementary and secondary academic standards must align with postsecondary readiness standards and career and technical education standards. They wanted students to be prepared for the jobs of the future and to compete with students from other states and nations.

The English/language arts Advisory Panel was composed of 27 teachers, three public post-secondary professors from institutions of higher education and two community members. The function of the Advisory Panel was to review the standards and make recommendations for changes to a Review Development Committee. In addition to the standards' revisions, the Advisory Panel created a new architectural structure for the standards. The English/language arts Standards Review and Development Committee was composed of six teachers, three public post-secondary professors from institutions of higher education and one community member. The function of the Review and Development Committee was to review the work and findings from the Advisory Panel and make recommendations to revise or replace existing standards.

Members of the Advisory Panels and Review and Development Committee were selected based on their expertise in the area of English/language arts, as well as being a practicing teacher in the field of English/language arts. The selection committee considered statewide representation, as well as both public secondary and higher education instruction, when choosing writers (Appendix A).

WRITERS' VISION STATEMENT

The writing team was guided by principles rooted in the belief that Kentucky teachers are consummate professionals driven by the altruistic desire to do what is best for their students. They envisioned standards constructed from language that is clear and directive, but not prescriptive. The standards were rewritten to consolidate redundancies, to reflect the current state of evidence-based research and to align the incremental expectations among grade-levels. They wanted teachers, schools and districts to be empowered to deliver curriculum that meets the expectations set forth by the standards. They also wanted the architecture to be useful and practical for teachers as they consult the standards in their daily work. The vision of the writers for the Reading and Writing standards was created by educators for educators with the purpose of preparing each and every Kentucky student for a productive post high school transition.

The KDE provided the following foundational documents to inform the writing team’s work:

Design Considerations

Guiding Principles and Grade-Specific Standards

The Guiding Principles define general, interdisciplinary literacy expectations that must be met for students to be transition ready. The K—12 grade-specific standards define end-of-year expectations and a cumulative progression designed to enable students to become transition ready no later than the end of high school. They are not anchored at the end of high school, but rather they are ongoing elements of literacy that can be applied by students as they transition to college and/or a career path. The grade-level standards provide additional specificity and context for the appropriate application of the Guiding Principles. Students advancing through the grades are expected to meet each year’s grade-specific standards, retain or further develop skills and understandings in preceding grades and work steadily toward meeting the broader expectations described by the Guiding Principles.

Balance of Building Knowledge and Applying Skills and Strategies

The standards place equal emphasis on the sophistication of what students read and the skill with which they read. For example, Reading Literature and Reading Informational Text Standard 10 defines a grade-by-grade “staircase” of increasing text complexity that rises from beginning reading and incorporates the reading strategies as the foundation to comprehension. Current research and best practice suggest that students comprehend texts best when they are able to activate schema, make meaning and recognize vocabulary. Exposing students to multiple texts and interdisciplinary content provides opportunities to build knowledge in meaningful ways. Thus, students should be encouraged to read about their interests and curiosities and to see the transference and application of knowledge between English/language arts and other content areas, such as science, social studies and math. They also should further that knowledge by writing about what they are reading and their existing understanding of terms, concepts and processes.

Early Literacy

To reinforce the importance of early literacy, the K-5 *Kentucky Academic Standards for Reading and Writing* include expectations for reading literary and informational texts, composition, language and foundational skills applicable across disciplines. The revisions to the K-5 standards align with and build upon the early childhood standards, providing a developmentally appropriate progression as students transition from preschool to kindergarten.

They articulate rigorous grade-level expectations essential to developing a strong infrastructure of essential early literacy skills in order to equip students with the skills and knowledge critical to be successful in later years and, ultimately, transition ready. For example, the reading literature and reading informational text strands introduce inferring in kindergarten rather than waiting until third grade as in the previous standards document. The standards also address the need to teach comprehension strategies beginning in kindergarten and continuing through grade 12 because of their importance in aiding comprehension. Changes like these provide intentional opportunities for students' critical thinking skills to begin developing much sooner than before and promotes the activation of those skills as students learn to process the meaning of texts through comprehension and analysis in early primary.

Interdisciplinary Literacy Practices

The Interdisciplinary Literacy Practices are built upon a foundation of common understandings — or practices — which provide the overarching goals for literacy instruction for each student across the state. These ten foundational practices are fundamental to fostering an environment that goes beyond teaching and learning isolated skills. This literacy-rich environment focuses on the larger vision and objective of empowering independent, life-long learners who think deeply and critically about text. The practices should not be confused as additional standards, but they should guide teachers in providing intentional opportunities for students to practice the behaviors of a literate citizen.

The ten interdisciplinary literacy practices are further clarified by possible teacher and student actions. These actions do not define curriculum, but rather they demonstrate how teachers can provide opportunities for students to experience the literacy practices and how students will apply these practices, so they may become an innate part of life across the disciplines and beyond school.

Figure 1 Interdisciplinary Literacy Practices Infographic

Multidimensionality

The Reading and Composition Standards consist of multiple dimensions or layers. The skills and content provide the “what” to help students access concrete and abstract “thinking” needed to practice the “doing” of reading and composing within the discipline. The previous literacy standards document lacked a focused dimensional approach; as a result, the perceived depth of a standard may have been limited to comprehension due to interpretation or deconstruction of opaque wording. By specifying the 3 dimensions separately, this standards document better communicates the intent of each standard so that local instruction and assessment will align to the intended depth. In planning and instruction, teachers will need to know when to utilize the interdependence of a text’s level of comprehension and analysis to develop the students’ skills and knowledge to become independent and proficient thinkers.

Distribution of Literary and Informational Text

The standards contain both a reading strand for literature and for informational text. Informational texts also are referenced in Composition Research Standards 5 and 6. Literary and informational texts are distinguished in two separate strands due primarily to the varied purposes for which students read different texts and the structural differences that mark the text types. In K-5, the standards follow the National Assessment of Educational Progress (NAEP)

Reading Framework (2017) for balancing the reading of literature with the reading of informational texts, including texts in history/social studies, science and technical subjects. In 6-12, the standards are in accordance with NAEP’s increased emphasis on informational texts. As a result, in the higher grades, the distribution requires a significant amount of reading informational texts take place in and outside the ELA classroom. Thus, to ensure transition readiness, students must be exposed to a wide variety of complex, grade-level texts, so they are equipped to read, comprehend and analyze texts as literate citizens in the 21st century.

21st Century Literacy

The digital media skills and understandings are embedded throughout the Interdisciplinary Literacy Practices and standards rather than addressed in a separate section. The Practices focus on students recognizing digital media as text, and Practice 7 states that students must “[u]tilize digital resources to learn and share with others.” The Writing strand has been revised and renamed as the Composition strand to denote the impact of digital literacy on the process of composing. Student composition should not be limited to writing on paper or drafting in a word processing document; instead, they should use digital resources to create, publish, research and update individual or shared products and to take advantage of technology’s capacity to link to other information and to display information flexibly and dynamically.

STANDARDS USE AND DEVELOPMENT

The Kentucky Academic Standards (KAS) are Standards, not Curriculum

The *Kentucky Academic Standards for Reading and Writing* outline the minimum content standards Kentucky students should learn in each grade-level English/language arts course. The standards address what is to be learned but do not address how learning experiences are to be designed or what resources should be used.

A standard represents a goal or outcome of an educational program. The standards do not dictate the design of a lesson plan or how units should be organized. The standards establish what students should know and be able to do at the conclusion of a course. The instructional program should emphasize the development of students' abilities to acquire and apply the standards. The curriculum must assure that appropriate accommodations are made for diverse populations of students found within Kentucky schools.

These standards are not a set of instructional or assessment tasks. They are statements of what students should be able to do after instruction. Decisions on how best to help students meet these program goals are left to local school districts and teachers.

Translating the Standards into Curriculum

The KDE does not require specific curriculum or strategies to be used to teach English/language arts, only the *Kentucky Academic Standards (KAS)*. Local schools and districts choose to meet those minimum required standards using a locally adopted curriculum. As educators implement academic standards, they, along with community members, must guarantee 21st-century readiness that will ensure all learners are transition-ready. To achieve this, Kentucky students need a

curriculum designed and structured for a rigorous, relevant and personalized learning experience, including a wide variety of learning opportunities. The *Kentucky Model Curriculum Framework* serves as a resource to help an instructional supervisor, principal and/or teacher leader revisit curriculum planning, offering background information and exercises to generate “future-oriented” thinking while suggesting a process for designing and reviewing the local curriculum.

Organization of the Standards

The *Kentucky Academic Standards for Reading and Writing* consist of the Reading Literature, Reading Informational Text, Composition, Language, Handwriting Skills (K-3) and Foundational Skills (K-5) strands. To parallel the federal Every Student Succeeds Act, Kentucky’s standards are titled *Kentucky Academic Standards for Reading and Writing*; however, the review committee intentionally chose to include a Composition strand rather than a Writing strand. They envisioned writing as more than the traditional use of paper and pencil or word processing as 21st Century literacy encompasses the use of digital resources to create, publish and research. The strands outline what a student should know and be able to do independently by the end of each grade in grades K-8 and each grade band for 9-10 and 11-12. Forming grade bands at the high school level allows schools and districts flexibility in course design. These grade-level specific and grade-banded standards intentionally support the learning progression as they strategically stair step students toward the guiding principles for each strand. The guiding principles represent broad statements about the expectations for students as they prepare for life after high school. In short, attainment of grade-level standards should prepare students to achieve the guiding principles.

Strands and Coding

The coding for the standards begins with an abbreviation of the strand followed by the grade-level in the middle and the standard number at the end. Strand abbreviations include RL for reading literature, RI for reading informational texts, C for composition (formerly labeled W for writing), L for language,

Strand	Abbreviation	Example	Meaning
Reading Literature	RL	RL.7.2	Reading Literature, Grade 7, Standard 2
Reading Informational	RI	RI.5.5	Reading Informational Text, Grade 5, Standard 5
Composition	C	C.9-10.1a	Composition, Grades 9-10, Standard 1, Substandard a
Language	L	L.11-12.5b	Language, Grades 11-12, Standard 5, Substandard b
Handwriting	HW	HW.K.1	Handwriting, Kindergarten, Standard 1
Reading Foundational Skills	RF	RF.K.3c	Reading Foundational Skills, Kindergarten, Standard 3, Substandard c

Guiding Principles

Guiding Principles frame each strand of the Reading and Writing standards. The guiding principles represent broad statements about the expectations for students after high school graduation. The number of guiding principles dictates the number of standards for a given strand. The Reading strands have ten principles, which are the same for both Literature and Informational Text. In the Composition Strand, there are seven guiding principles and

The Guiding Principles are listed on every grade-level standards page and viewable within each standard breakdown.

Interdisciplinary Literacy Practices

The ten Interdisciplinary Literacy Practices are visible and numbered 1-10 on each main standards page to the right of the standards to emphasize the strong connection between standards and practices. It is important for teachers to embed opportunities for students to experience the practices daily as they teach the standards and create a literacy-rich environment.

Reading Standards for Informational Text Grade 2		Interdisciplinary Literacy Practices

RI.2.6	Identify the main purpose of a text, including what the author wants to answer, explain, or describe, and how that purpose shapes the content of the text.	6	Collaborate with others to create new meaning.
Integration of Knowledge and Ideas			
RI.2.7	Identify information gained from visuals and words in the text and explain how that information contributes to understanding of the text.	7	Utilize digital resources to learn and share with others.
RI.2.8	Describe how reasons support specific claims the author makes in a text.	8	Engage in specialized, discipline-specific literacy practices.
RI.2.9	Describe the relationship between information from two or more texts on the same theme or topic.	9	Apply high level cognitive process to think deeply and critically about text.
Range of Reading and Text Complexity			
RI.2.10	By the end of the year, flexibly use a variety of comprehension strategies (i.e., questioning, monitoring, visualizing, inferencing, summarizing, using prior knowledge, determining importance) to read, comprehend, and analyze grade-level appropriate, complex informational texts independently and proficiently.	10	Develop a literacy identity that promotes lifelong learning.

The ten Interdisciplinary Literacy Practices are included on each grade-level standards page.

Multidimensionality

Coding is used to show how each individual standard is multidimensional. The dimensions are denoted as follows:

WORDS IN ORANGE= CONTENT	Words in Green= Comprehension	Words in Purple-Analysis
The tools of an author and the objects of literacy woven into the skills students must access and apply when developing comprehension and performing analysis	This concrete dimension requires the objective understanding of a text, topic or convention of language.	This abstract dimension requires more than objective understanding of main ideas and key details. The ability to read “between or above the lines” is how students become critical thinkers.
Examples: central idea, theme, tone, structure, syntax	Examples: decoding language and words in context, being able to effectively summarize or retell what has been read, knowing the grammar rule	Examples: critical reading to determine underlying meaning and purpose, determining WHY an author made particular choices, being able to effectively explain inferences and what is implied.

Example of a standard coded for multidimensionality:

RI.7.2	Determine CENTRAL IDEAS of a text and analyze their development through <i>citing textual evidence, paraphrasing, or summarizing</i> .

Standard Breakdown

Each standard can be viewed with the guiding principle, progression and multidimensionality in the standard breakdown as shown below .

READING GUIDING PRINCIPLE

Interdisciplinary Literacy Practices

Interdisciplinary Literacy Practices

The Interdisciplinary Literacy Practices are built upon a foundation of common understandings — or practices — which provide the overarching goals for literacy instruction for each student across the state. These ten foundational practices are fundamental to fostering an environment that goes beyond teaching and learning isolated skills. This literacy-rich environment focuses on the larger vision and objective of empowering independent, lifelong learners who think deeply and critically about text. The practices should not be confused as additional standards, but they should guide teachers in providing intentional opportunities for students to practice the behaviors of a literate citizen.

Collectively and independently, the practices support the KBE’s vision, which is intended to ensure each and every Kentucky student is empowered and equipped with the academic, cognitive, metacognitive, technical and employability skills required for postsecondary success, as well as the capacity to positively contribute to the world around him or her. The ten Interdisciplinary Literacy Practices are clarified further by possible teacher and student actions. These actions illustrate what the teacher and students may be doing in a classroom that employs the interdisciplinary practices. While the examples do not provide an exhaustive list, they do demonstrate how teachers can provide opportunities for students to experience the literacy practices and how students will apply these practices, so they may become an innate part of life across the disciplines and beyond school.

1. Recognize that text is anything that communicates a message.

As 21st century learners, students interpret both print and non-print content, while expanding their traditional understanding of text to include visual, auditory and digital sources. Print and non-print content across themes and disciplines provides ongoing and increasingly rigorous opportunities for students to interpret messages communicated through different media.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">Intentionally choose print and non-print interdisciplinary texts to demonstrate the variety of ways in which authors can communicate meaning.	<ul style="list-style-type: none">Recognize the author’s perspective and intended meaning in creating the message in both print and non-print text.Recognize that messages are conveyed with different purposes and through varying forms, whether the text is visual, auditory or digital.

2. Employ, develop and refine schema to understand and create text.

Students' schema provide the lens through which they view new information. Exposing students to multiple texts and interdisciplinary content provides opportunities to build knowledge in meaningful ways. By activating prior knowledge, developing new connections, applying specialized vocabulary and reflecting on new understanding, students are equipped as literate learners in the 21st century.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Prompt students through questioning, scenarios, simulations or other strategies to activate prior knowledge.• Use students' schema associated with both content (background) knowledge and literacy strategies to break down, approach or create a text.• Offer students an opportunity to make connections to texts, interdisciplinary contexts, themselves and the outside world.	<ul style="list-style-type: none">• Use the term <i>schema</i> in describing their existing understanding of terms, concepts and processes.• Apply and refine schema to understand new concepts.• Reflect on interdisciplinary information and understand the impact it has on their learning.

3. View literary experiences as transactional, interdisciplinary and transformational.

Students' understanding and use of text are dependent upon the transaction between the reader, the text itself and the context. This transaction values the parameters of the text, the input of the reader and the opportunities in the classroom to build understanding. When students' literacy experiences cross traditional disciplinary boundaries, their knowledge is expanded and relevant. Furthermore, students' interactions

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Assist students in understanding that meaning in a text is generated by the <i>transaction</i> between the text itself and the experiences, ideas or perspectives the reader brings.• Use engaging, interdisciplinary texts that prompt student action or inquiry.	<ul style="list-style-type: none">• Blend the information provided by multiple texts with schema to provide understanding.• Use the literary experience to either change or inform an opinion or to take action.

4. Utilize receptive and expressive language arts to better understand self, others and the world.

Employing both *receptive* (i.e., listening, reading and viewing) and *expressive* (i.e., speaking, writing and visually representing) elements values *all* language arts as interrelated and critical to the meaning-making process. Experiencing connected and relevant literacy instruction motivates students to think critically about their relationship to the world.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Provide students with connected and relevant literacy instruction so that they read like a writer/write like a reader, or speak like a listener/listen like a speaker, etc.• Offer varied but related messages from written, auditory and/or graphic texts to examine how receptive and expressive texts are interrelated.	<ul style="list-style-type: none">• Create a product (using one of the expressive arts) that reflects a deep and critical understanding of content (using the receptive arts).• Engage actively in their listening, reading and viewing experiences.

5. Apply strategic practices, with scaffolding and then independently, to approach new literacy tasks.

When students strategically approach literacy tasks, they make intentional decisions about when, where and how to apply thinking and learning processes. Independence and transference ultimately empower students as lifelong learners.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Offer and model various learning strategies for how to approach a new text.• Provide opportunities for students to self-regulate by choosing appropriate strategies for a new task.	<ul style="list-style-type: none">• Use learning strategies to access unfamiliar or new literacy tasks.• Decide which strategy best meets the need for a particular text or task.

6. Collaborate with others to create meaning.

Since learning does not occur in isolation, students should interact with others to confirm, challenge or shape their views and ideas. Collaboration facilitates understanding and develops an appreciation of diverse experiences and perspectives.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Provide multiple opportunities for collaboration on a variety of texts.• Use collaborative exercises to prompt students' consideration of diverse experiences and perspectives.	<ul style="list-style-type: none">• Listen actively and respectfully to one another to refine understanding and broaden perspectives.• Contribute ideas actively and respectfully in order to refine understanding and broaden perspectives.

7. Utilize digital resources to learn and share with others.

As members of an interconnected society, students must be productive digital citizens. Knowing how to effectively produce and critically consume digital information equips students to function within and contribute to a world beyond their immediate classroom.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Instruct students on the ethical use of technology and credibility of digital sources.• Provide students with multiple opportunities to learn, communicate and create using various digital resources.	<ul style="list-style-type: none">• Demonstrate ethical use of technology in learning, communicating and creating.• Critique digital sources to determine their accuracy and usefulness.

8. Engage in specialized, discipline-specific literacy practices.

Students recognize the impact of form, function and content area on literacy approaches. By adopting a disciplinary perspective, they utilize the thinking and learning processes valued within that discipline to interact meaningfully with the text.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Provide multiple examples of literary forms (e.g., poetry, prose, drama, etc. in E/LA), focusing on the necessary approaches to comprehend the form presented.	<ul style="list-style-type: none">• Employ discipline-specific approaches to interpret authentic texts.• Create text according to conventions, processes, information and forms that are valued by the discipline.

9. Apply high level cognitive processes to think deeply and critically about text.

Students must move beyond basic comprehension and interact more deeply with the text. By applying synthesis, analysis, reflection and other higher order thinking skills, students are equipped to examine text critically.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Use direct instruction to model and practice specific thinking processes (e.g., application, synthesis, analysis, creativity, etc.).• Scaffold instruction to assist students in synthesizing ideas from multiple texts.	<ul style="list-style-type: none">• Reflect verbally and/or through written expression on the content of a text.• Annotate text to interact with and analyze the content.• Break down a text to determine the use of literary devices/techniques and their effect.

10. Develop a literacy identity that promotes lifelong learning.

Students should view themselves as lifelong learners who take an active role in their literacy development, understanding they impact and are impacted by their interactions with text.

Possible Teacher Actions	Possible Student Actions
<ul style="list-style-type: none">• Discuss the role of an active and engaged reader.• Provide opportunities for all levels of readers and writers to experience success.• Offer a variety of engaging texts geared toward student interest, demonstrating that multiple reading options exist.	<ul style="list-style-type: none">• Utilize a variety of texts for multiple purposes, both inside and outside of the classroom.• Take risks in applying various strategies and techniques in reading and writing.

Appendix A: Writing and Review Committees

The writing team, composed of current English/language arts K-12 teachers, university professors and community members, represented both rural and urban settings from several regions of the state.
