**ATTESTATION:**

In accordance with 907 KAR 3:170 and as a KTHN member providing telehealth services to Medicaid recipients, I agree to comply with all policies, standards and protocols established by the Kentucky Telehealth Board regarding confidentiality and data integrity, privacy and security, informed consent, privileging and credentialing, reimbursement, licensure, technology and reporting, including but not limited to:

- The requirement that both sides of the telehealth encounter, where the provider ("hub-site") and patient ("spoke site") are located, be members of the KTHN network.
- The requirement that all providers shall utilize secure communications technology and all applicable federal, state and local laws and regulations, including but not limited to, those protecting patient privacy and the confidentiality and security of protected health information when conducting all telehealth encounters.
- The requirement that all providers shall utilize a telemedicine informed consent form.
- The requirement that all providers shall utilize real-time, interactive voice and video technologies. Medicaid, Medicare and the Kentucky Telehealth Board have defined telehealth as the delivery of healthcare-related services from a provider to a patient or another provider through a face-to-face encounter using real-time, interactive voice and video technologies. Telehealth is not electronic mail, text chat, facsimile or standard audio-only telehealth call.
- The requirement that all providers shall utilize standard billing codes, including the addition of the "GT" modifier code to designate that an encounter was performed via telehealth. Billing should be completed at the "hub site" which is where the telehealth provider or telehealth practitioner performs telehealth and is considered the place of service.
