

GCMS Teacher Self Reflection 18-19

Using a copy of the Teacher's Framework answer the following questions for your reflection. This is due by the end of the day on August 31, 2018.

Self Reflection is used to establish your priority growth needs. You will use this to determine what the focus for your Professional Growth Plan will be. Once you submit this form, you will automatically receive a copy of your answers through email.

Your email address (jennifer.biddle@gallatin.kyschools.us) will be recorded when you submit this form. Not you? [Switch account](#)

Domain 1: Planning and Preparation

1A - Demonstrating Knowledge of Content and Pedagogy *

Charlotte-Mecklenburg Framework for Teaching, 2011

Domain 1: Planning & Preparation

Adapted for Kentucky Department of Education

| 1A - Knowledge of Content and Pedagogy | In order to guide student learning, accomplished teachers have command of the subjects they teach. They must know how the discipline has evolved into the 21 st century, incorporating such issues as global awareness and cultural diversity, as appropriate. Accomplished teachers understand the internal relationships within the disciplines they teach, knowing which concepts and skills are prerequisites to the understanding of others. They are also aware of typical student misconceptions in the discipline and work to dispel them. Key knowledge of the content is not sufficient in advancing student understanding; teachers are familiar with the particular pedagogy of approaches best suited to each discipline. | | | |
|--|---|---|--|--|
| | Ineffective | Developing | Accomplished | Exemplary |
| <ul style="list-style-type: none"> Knowledge of Content and the Structure of the Discipline Knowledge of Pedagogical Approaches Knowledge of Content Pedagogy | <ul style="list-style-type: none"> In planning and delivery, teacher makes content or process decisions that are not at times made by students. Teacher's plan and practice display little understanding of prerequisite relationships important to student's knowledge of the content. Teacher displays little to no understanding of the range of pedagogical approaches available to effectively teach the content. | <ul style="list-style-type: none"> Teacher is familiar with the important concepts in the discipline but displays lack of awareness of how these concepts relate to one another. Teacher's plan and practice indicate some awareness of prerequisite relationships, although such knowledge may be incomplete or inaccurate. Teacher's plan and practice reflect a limited range of pedagogical approaches to the discipline or to the materials. | <ul style="list-style-type: none"> Teacher displays solid knowledge of the important concepts in the discipline and the ways they relate to one another. Teacher's plan and practice reflect accurate understanding of prerequisite relationships among topics and concepts. Teacher's plan and practice reflect familiarity with a wide range of effective pedagogical approaches to the discipline. | <ul style="list-style-type: none"> Teacher displays extensive knowledge of the important concepts in the discipline and the ways they relate to one another and to their disciplines. Teacher's plan and practice reflect an understanding of prerequisite relationships among topics and concepts and provides a link to necessary cognitive structures needed by students to ensure understanding. Teacher's plan and practice reflect familiarity with a wide range of effective pedagogical approaches to the discipline, adapting them to meet individual students' needs. |
| Critical Attributes <ul style="list-style-type: none"> Teacher makes no effort to make Teacher does not consider prerequisite relationships when planning. Teacher's plan and practice display no understanding of the discipline. | <ul style="list-style-type: none"> Teacher is familiar with the discipline's ideas, but the conceptual relationships are not fully understood. Teacher's knowledge of prerequisite relationships is incomplete or inaccurate. Teacher's plan and practice reflect a limited understanding of the discipline, and some may not be suitable for the content. | <ul style="list-style-type: none"> The teacher can identify areas of concepts of the discipline and their relationships to one another. The teacher consistently provides a clear explanation of the content. The teacher answers student questions accurately and provides feedback that furthers the learning. The teacher seeks out content-related professional development. The teacher's plan and practice permit multiple strategies to determine the shape that will best fit the content for a given parameter. The teacher makes his or her students aware of how to use resources to the fullest to ensure that before introducing the materials or implementation. The teacher plans to expand a unit or lesson by being students' cognitive road map. | <ul style="list-style-type: none"> The teacher is the main provider of "background" information. Teacher's content and content pedagogy content is incomplete. Teacher is proactive in uncovering student misconceptions and addressing them before presenting. | |
| Possible Examples <ul style="list-style-type: none"> The teacher says, "The official language of Kentucky is English, and the official state language is Spanish." The teacher says, "I don't understand why we have to mix in the history of the state with the math." The teacher asks students to explain why the state has a mix of Spanish and English in its name to help the students learn to spell difficult words. | <ul style="list-style-type: none"> The teacher plans to mix an area and present the interrelationship of one another, without using the concepts together. The teacher plans to begin ahead with a lesson on a topic with no prerequisite, even though some students have not fully grasped that topic. The teacher says, "I plan to use the same example to show solving problems Monday, copy the same 3 times each on Tuesday, and Wednesday, and then on Friday." | <ul style="list-style-type: none"> The teacher can identify areas of concepts of the discipline and their relationships to one another. The teacher consistently provides a clear explanation of the content. The teacher answers student questions accurately and provides feedback that furthers the learning. The teacher seeks out content-related professional development. The teacher's plan and practice permit multiple strategies to determine the shape that will best fit the content for a given parameter. The teacher makes his or her students aware of how to use resources to the fullest to ensure that before introducing the materials or implementation. The teacher plans to expand a unit or lesson by being students' cognitive road map. | <ul style="list-style-type: none"> The teacher is the main provider of "background" information. Teacher's content and content pedagogy content is incomplete. Teacher is proactive in uncovering student misconceptions and addressing them before presenting. | |

1A - Demonstrating Knowledge of Content and Pedagogy - What is your rationale for your rating of yourself? *

Your answer

1B - Demonstrating Knowledge of Students *

Mathematical Practice Framework for Teaching, 2011

Content Learning & Assessment

Model for the Core Knowledge of the Teacher

| 1B - Demonstrating Knowledge of Students <ul style="list-style-type: none"> • Knowledge of Child and Adolescent Development • Knowledge of the Learning Process • Knowledge of Students' Skills, Knowledge, and Language Proficiency • Knowledge of Differences Between and Within Students • Knowledge of Students' Special Needs critical indicators | Teachers who teach content in the classroom, they learn to do so, in order to ensure student learning, therefore, teachers must know not only their subject content and related pedagogy but the students to whom they wish to teach that content. In ensuring student learning, teachers must appreciate what recent research in cognitive psychology has confirmed, namely, that students learn through active and deliberate engagement with content. While there are patterns in cognitive, social, and emotional development, stages typical of different age groups, students learn in their individual ways and may have weaknesses or misconceptions that the teacher needs to recognize in order to plan appropriate learning activities. In addition, students have been largely underserved that include all ethnic and racial groups, students in their neighborhoods, and family and cultural traditions. Students whose first language is not English, as well as students with other special needs, must be considered when planning lessons and identifying resources that will ensure their understanding. | | | |
|---|---|--|---|--|
| | Ineffective | Developing | Accomplished | Exemplary |
| | <ul style="list-style-type: none"> • Teacher demonstrates a general understanding of how children learn and what knowledge and skills they acquire in various cultures, styles, language proficiencies, abilities, and special needs and does not use that understanding. | <ul style="list-style-type: none"> • Teacher indicates a growing attitude of understanding how students learned the subject's background, culture, skills, language proficiencies, interests, and special needs, and attempts to use that knowledge about the student as a whole. | <ul style="list-style-type: none"> • Teacher understands the unique nature of student learning and attains information about levels of development for groups of students. • The teacher also purposefully uses knowledge from critical features of students' backgrounds, primary skills, language proficiency, interests, and special needs to identify and use knowledge about groups of students. | <ul style="list-style-type: none"> • Teacher fully uses knowledge of students' levels of development about their backgrounds, interests, skills, language proficiencies, interests, and special needs to make variety of choices. This information is available for individual students. <p>In addition to the characteristics of "accomplished"</p> <ul style="list-style-type: none"> • The teacher uses ongoing methods to assess students' skills levels and language proficiencies accurately. • The teacher uses a variety of information about their cultural heritages from all sources. • The teacher maintains a system of updated student records and uses pertinent records and/or learning needs to inform plans. |
| <ul style="list-style-type: none"> • Teacher does not understand what developmental levels students could have, especially non-typical students. • Teacher does not try to assess or varied ability levels among students in the class. • Teacher does not use differentiated instruction at different stages. • Teacher takes no responsibility to learn about students' medical or learning disabilities. | <ul style="list-style-type: none"> • Teacher does not understand all theory but does not try to integrate it into lesson planning. • Teacher is aware of the different ways seen in the data to reach students in the "middle group." • The teacher recognizes that children have different talents and cultural backgrounds and rarely shows or shows accommodations or differentiated materials to accommodate those differences. • The teacher is aware of medical issues and working directly with other students but does not use or understand the implications of that knowledge. | <ul style="list-style-type: none"> • The teacher knows, by groups of students, their levels of English development. • The teacher is aware of the different cultural backgrounds in the class. • The teacher has a good idea of the range of interests of students in the class. • The teacher has identified "high", "mid-range", and "low" groups of students within the class. • The teacher is well informed about students' cultural heritages and how to use that information to inform lesson plans. | | |

1C - Selecting Instructional Outcomes *

Charlotte Barber's framework for teaching, 2011

Review of Hiring & Evaluation

Adapted for Kentucky Department of Education

| <p>1C - Setting Instructional Outcomes</p> <ul style="list-style-type: none"> • Vision, requirements, and alignment • Equity • Access • Accessibility for diverse learners | <p>Setting is a selected activity, even the most important activities are selected for a certain desired learning. Therefore, establishing instructional outcomes entails identifying exactly what students will be expected to learn. The outcomes describe not what students will do but what they will learn. The instructional outcomes should reflect important learning and mind level themselves to a wide form of assessment so that all students are able to demonstrate their understanding. The content, level of the outcomes, domains, the instructional strategies, the resources used, their capability for diverse learners, and the methods of assessment employed, they hold a central place in designing learning outcomes used a number of different types: factual and procedural knowledge, conceptual understanding, thinking and reasoning skills, and collaborative and communication strategies. In addition, some key responsibilities refer to developing, analyzing the potential for students to learn in real, but educators also hope that they will be able to read. In addition, experienced teachers are able to reflect their learning outcomes with others both within their disciplines and in other disciplines.</p> | | | |
|--|---|---|--|--|
| | <p>Ineffective</p> | <p>Developing</p> | <p>Accomplished</p> | <p>Exemplary</p> |
| <p>Critical Attributes</p> <ul style="list-style-type: none"> • Outcomes lack rigor. • Outcomes do not represent important learning in the discipline. • Outcomes are not clearly stated as outcomes. • Outcomes are not accessible for many students in the class. | <ul style="list-style-type: none"> • Outcomes represent low expectations for students and lack of rigor, and not all of them reflect important learning in the discipline. • Outcomes are stated in a vague manner that is hard to follow. • Outcomes reflect only one type of learning and only one discipline, without any flexibility for other students. | <ul style="list-style-type: none"> • Outcomes represent moderate to high expectations and rigor. • Some outcomes reflect important learning in the discipline and consist of a wide range of instructional activities and strategies. • Outcomes reflect several types of learning, but teacher has made no attempt to consider differentiation. • Most of the outcomes are written for most of the students in the class, in accordance with general assessment of student learning. | <ul style="list-style-type: none"> • Most outcomes represent rigorous and important learning in the discipline. • All are instructional outcomes on a clear, and written in the form of student learning, and suggest viable methods of assessment. • Outcomes reflect several different types of learning and opportunities for differentiation. • Outcomes take into account the learning needs of groups of students. | <ul style="list-style-type: none"> • All outcomes represent rigorous and important learning in the discipline. • The outcomes are clear, and written in the form of student learning, and provide viable methods of assessment. • Outcomes reflect several different types of learning and, where appropriate, represent opportunities for both individual and group learning. • Outcomes take into account the general needs of individual students. <p>In addition to the characteristics of "accomplished":</p> <ul style="list-style-type: none"> • Outcomes clearly indicate important learning in the discipline. • Outcomes are clearly stated as outcomes. • Outcomes are differentiated to ensure all students in the class are able to learn. • Outcomes are differentiated to ensure all students in the class are able to learn. |

1D - Demonstrating Knowledge of Resources *

Charlotte Danielson's Framework for Teaching, 2012

Domain 1: Planning & Preparation

Adapted for Kentucky Department of Education

| <p>1D - Demonstrating Knowledge of Resources</p> <ul style="list-style-type: none"> Requires the teacher to know the content, resources, and strategies available for students. | <p>Student learning is enhanced by a teacher's skillful use of resources, some of which are provided by the school as "official" materials, often are learned by teachers through their own practices. Resources fall into several different categories: those used in the classroom by students, those available beyond the classroom walls to enhance student learning, those for teachers to further their own professional knowledge and skills, and those that can provide more individualized instruction for students. Teachers recognize the importance of discretion in the selection of resources, choosing those that align directly with the learning outcomes and that will be of most use to the students. An exemplary teacher also ensures that the selection of materials and resources is appropriately differentiating for every student's needs. For example, are available at various reading levels to guarantee all students access to the content and resources. Additionally, demonstrating understanding of the learning outcomes, further may expect teachers look beyond the school for resources to bring their subjects to life and to avoid students who need help with the content and the academic base.</p> | | | |
|---|---|---|---|------------------|
| | Ineffective | Developing | Accomplished | Exemplary |
| <p>Critical Attributes</p> <ul style="list-style-type: none"> The teacher uses only limited provided materials, even when more variety would assist some students. The teacher does not select and resources available to expand his or her own skill. Although aware of some student needs, the teacher does not require or select possible resources. | <p>Critical Attributes</p> <ul style="list-style-type: none"> The teacher uses materials in the official curriculum but not in a highly innovative or useful manner. The teacher utilizes resources in a limited way and does not use the school but does not pursue other professional development. The teacher seeks materials and resources for students but are available through the school but does not pursue any other avenues. | <p>Critical Attributes</p> <ul style="list-style-type: none"> The teacher uses multiple and varied professional resources to expand his or her own skill. The teacher expands his or her own professional knowledge with professional learning goals and organizations. The teacher utilizes materials from a variety of sources. The teacher provides materials for students to use. | <p>Critical Attributes</p> <ul style="list-style-type: none"> The teacher uses multiple and varied professional resources to expand his or her own skill. The teacher expands his or her own professional knowledge with professional learning goals and organizations. The teacher utilizes materials from a variety of sources. The teacher provides materials for students to use. | |
| <p>Possible Examples</p> <ul style="list-style-type: none"> For their math class, the teacher assigned all of the problems from the textbook and some students. Mr. L. is not sure how to teach fractions but doesn't know how to expand on them in his class. Although aware of some student needs, the teacher does not require or select possible resources. | <p>Possible Examples</p> <ul style="list-style-type: none"> For their math class, the teacher only used the textbook, but the school has many more for him to use. The teacher uses the textbook from one side of the room, but the school offers only one professional development day per year. The teacher thinks the students would prefer learning about math using some professional resources but the school does not have any. | <p>Possible Examples</p> <ul style="list-style-type: none"> The teacher uses multiple and varied professional resources to expand his or her own skill. The teacher expands his or her own professional knowledge with professional learning goals and organizations. The teacher utilizes materials from a variety of sources. The teacher provides materials for students to use. | <p>Possible Examples</p> <ul style="list-style-type: none"> The teacher uses multiple and varied professional resources to expand his or her own skill. The teacher expands his or her own professional knowledge with professional learning goals and organizations. The teacher utilizes materials from a variety of sources. The teacher provides materials for students to use. | |

Your answer

1E - Designing Coherent Instruction *

Charlotte-Dodge's Framework for Teaching, 2011

Element 3: Planning & Preparation

Adapted for Kentucky Department of Education

| <p>1C - Designing Coherent Instruction</p> <ul style="list-style-type: none"> • Learning Activities • Instructional Materials • Instructional Grouping • Instructional Strategies | <p>Designing coherent instruction is the heart of planning, reflecting the teacher's knowledge of content and the students in the class, the intended outcomes of instruction, and the available resources. Such planning requires that educators have a clear understanding of the state, local, and school expectations for student learning, and the skill to translate these into a coherent plan. It also requires that teachers understand the characteristics of the students they teach and the nature of student learning. A high-quality plan determines how best to organize instruction in a way that will address student learning through the careful selection, differentiation, and delivery of content. It further requires the thoughtful construction of lessons that contain cognitively engaging learning activities, the organization of appropriate resources and materials, and the intentional grouping of students. Subsequent practices in this component recognize that a well-designed instruction plan addresses the learning needs of all groups of students; one size does not fit all. At the design stage, well-designed plans anticipate that taken into account the specific learning needs of each student and adjust plans from students' achievement to structure for learning.</p> | | | | | | | | | | | | |
|---|--|--|---|---------------------|------------------|---|---|--|---|---|--|--|---|
| <p>1E - Designing Coherent Instruction</p> | <table border="1"> <thead> <tr> <th data-bbox="316 359 592 388">Ineffective</th> <th data-bbox="592 359 868 388">Developing</th> <th data-bbox="868 359 1144 388">Accomplished</th> <th data-bbox="1144 359 1411 388">Exemplary</th> </tr> </thead> <tbody> <tr> <td data-bbox="316 388 592 619"> <ul style="list-style-type: none"> • The terms of learning experiences are poorly aligned with the instructional outcomes and the assignment a teacher chooses • The activities are not designed to engage students in any of the intended activity and have a narrow focus on content without recognizing or supporting the instructional outcomes and effectiveness </td> <td data-bbox="592 388 868 619"> <ul style="list-style-type: none"> • Some of the learning activities and materials are suitable to the instructional outcomes and present a moderate challenge for different groups of students • Instructional resources partially support the instructional outcomes, with an effort by the teacher to provide some variety • The lesson structure is recognizable, but does not have the high quality of activities or variety with most time effectively organized </td> <td data-bbox="868 388 1144 619"> <ul style="list-style-type: none"> • Teacher demonstrates knowledge of content, of students, and of resources, to design a series of learning experiences aligned to both of each outcome and suitable to groups of students. • The learning activities have reasonable descriptive alignment to the intended instructional outcomes, with some differentiation for different groups of students. • The lesson structure has a clear structure, with appropriate and variety of instructional groups. </td> <td data-bbox="1144 388 1411 619"> <ul style="list-style-type: none"> • Plans represent the combination of in-depth content knowledge, understanding of different student groups, and available resources (including technology), resulting in a series of learning activities designed to engage students in high-level cognitive activity • Learning activities are differentiated appropriately for individual students. 1E - Designing Coherent Instruction - What is your rationale for your rating of yourself? *

Your answer

1F - Designing Student Assessment *

Charlotte-Mecklenburg Schools Framework for Teaching, 2021

Domain 1: Planning & Preparation

Adapted for Kentucky Department of Education

| <p>D - Designing Student Assessments</p> <ul style="list-style-type: none"> • Designing authentic, varied, and rigorous assessments • Designing standards-aligned assessments • Designing alternative assessment methods • Assessing to measure student learning | <p>Good teaching requires both a variety of learning and assessment for learning. Assessment of learning ensures that teachers know that students have learned the intended outcomes. These assessments must be designed in such a manner that they provide evidence of the full range of learning outcomes that is, to assess reasoning skills and factual knowledge, different methods are needed. Furthermore, such assessments may need to be adapted to the particular needs of individual students, as all students, for example, may need an alternative method of assessment to allow demonstration of understanding. Assessment for learning enables a teacher to improve the assessment directly through the instructional process, and to modify or adapt instruction as needed to ensure student understanding. Such assessments, although used during instruction, must be designed as part of the planning process. Such formative assessment strategies are ongoing and may be used by both teachers and students to monitor progress toward the understanding of the learning outcomes.</p> | | | |
|---|---|--|---|--|
| | <p>Ineffective</p> <ul style="list-style-type: none"> • Assessment methods are not aligned with individual students' learning needs • Teacher does not plan to incorporate formative assessment in the lesson or unit • No explicit plan for assessment results to be used for instruction | <p>Developing</p> <ul style="list-style-type: none"> • Some of the individual outcomes are assessed through the proposed approach for this assessment • Assessment methods and standards have been developed, but they are not clear • Approach to the use of formative assessment is inconsistent, including only some of the instructional activities • Teacher needs to use assessment results to plan for future instruction for the class as a whole | <p>Accomplished</p> <ul style="list-style-type: none"> • Teacher plan for student assessment is aligned with the individual outcomes; assessment methods designed have been adapted for specific students • Assessment methods and standards are clear. Teacher has a well-developed strategy for using formative assessment and has designed particular approaches to be used • Teacher intends to use assessment results to plan for future instruction for individual students | <p>Exemplary</p> <ul style="list-style-type: none"> • Teacher plan for student assessment is highly aligned with the individual outcomes and the standards and standards that show evidence of student understanding to their development • Assessment methods designed have been adapted for individual students as needed • The approach to using formative assessment is well designed and includes students as well as teacher use of the assessment information. Teacher intends to use assessment results to plan for future instruction for individual students |
| <p>Initial Attributes</p> <ul style="list-style-type: none"> • Assessment does not align instructional outcomes • Assessments have no intent • No explicit assessment plan has been designed • Assessment results are not used for instruction | <ul style="list-style-type: none"> • Only some of the individual outcomes are addressed in the proposed assessment • Assessment methods are vague • They need to be clear and aligned with the use of formative assessment, but they are not fully developed • Assessment results are used to design instruction for the whole class, not individual students | <ul style="list-style-type: none"> • All the learning outcomes have a strategy for assessment • Assessment types match learning expectations • Plans include modified assessments for some students as needed • Assessment methods are clearly defined • Plans include formative assessment to use during instruction • Plans plus strategies provide approaches based on formative assessment data | <ul style="list-style-type: none"> • All the learning outcomes are addressed • Assessment methods are clearly defined and aligned with learning expectations • Plans include modified assessments for some students as needed • Assessment methods are clearly defined • Plans include formative assessment to use during instruction • Plans plus strategies provide approaches based on formative assessment data | |

Domain 2: Classroom Environment

2A - Creating an Environment of Respect and Rapport *

Florida Educators' Framework for Teaching, 2011

Domain 2: The Classroom Environment

Approved for Secretary Department of Education

| 2A - Creating an Environment of Respect and Rapport | An overall goal of teaching is that of nurturing relationships with students and ensuring that those among students are positive and supportive. Teachers create an environment of respect and rapport in their classrooms by the way they interact with students and by the level of care they encourage and utilize in assignments. An important aspect of respect and rapport relates to how the teacher responds to students and how students are permitted to treat one another. Patterns of interaction are critical to the overall tone of the day. In a respectful environment, all students feel valued and safe. | | | |
|---|--|---|---|--|
| <ul style="list-style-type: none"> Teacher attends to all students, including both sexes and abilities. Systematically uses all disciplines, including both words and actions. | Ineffective <ul style="list-style-type: none"> Patterns of classroom interaction, both between the teacher and students and among students, are mostly negative, disrespectful, or unneutral to students age, cultural, language, and developmental skills. Interactions are characterized by sarcasm, put-downs, or hostility. Teacher does not deal with disrespectful behavior. | Developing <ul style="list-style-type: none"> Patterns of classroom interaction, both between the teacher and students and among students, are generally appropriate but may reflect occasional disrespectful, sarcastic, and disrespectful treatment, culture, and developmental levels. Teachers rarely demonstrate discipline for one another. Teacher attempts to respond to disrespectful behavior, but interventions are the result of the interaction in neutral, removing context, sarcasm, and conflict. | Accomplished <ul style="list-style-type: none"> Teacher and first interactions are friendly and demonstrate general caring and respect. All interactions are appropriate to the ages of the students. Students exhibit respect for the teacher. Interactions among students are generally polite and respectful. Teacher respectfully and actively intervenes to resolve disrespectful students. The result of the intervention is polite and respectful, but inconsistent. | Exemplary <ul style="list-style-type: none"> Classroom interactions among the teacher and students are consistently highly respectful, reflecting a positive and neutral tone and a focus on the needs of students. Students exhibit respect for the teacher and demonstrate high levels of mutual respect between all members of the class. The set level of interactions is that of respect to all students in the class. |
| Critical Attributes <ul style="list-style-type: none"> Teacher expects respectful behavior in students; student closely fulfills expectations through all interactions. Students have developed the habit of interacting respectfully with one another when prompted from the teacher. Teacher displays a reluctance to act or respond to disrespectful student behavior or consequences. | <ul style="list-style-type: none"> The quality of interactions between teacher and students, as among students, is generally without incident, respectful, and neutral, but may be disrespectful behavior among students, with unclear results. Teacher attempts to intervene occasionally with individual students, but student teachers indicate that the effort are not consistently successful or effective. | <ul style="list-style-type: none"> Interactions between teacher and students and among students are consistently respectful. Teacher responds to disrespectful behavior among students. Teacher makes consistent connections with individual students. | <ul style="list-style-type: none"> In addition to the characteristics of "accomplished": Teacher demonstrates knowledge and caring across individual students' lives beyond school. When necessary, students correct one another before a teacher has to intervene. There is no "strategic" behavior among students. The teacher responds to a student's disrespectful response respects the student's dignity. | |

2C - Managing Classroom Procedures *

Charlotte-Mecklenburg Schools Learning, 2017

Component: The Classroom Environment

Adapted for Kentucky Department of Education

| 2C - Managing Classroom Procedures | | A smoothly functioning classroom is a prerequisite to good instruction and high levels of student engagement. Teachers establish and monitor routines and procedures for the smooth operation of the classroom and the efficient use of time. Indicators of a well-managed operation of the classroom are that instructional groups are used effectively, materials and tasks are completed efficiently, and transitions between activities and management of materials and supplies are smoothly done in order to maintain structure and insure the instructional time. The establishment of efficient routines and practices in leading students to carry their items may be related from the view that the class "runs itself". | | | |
|--|--|--|---|--|---|
| • Management of Instructional Groups • Management of Transitions • Management of Materials and Supplies • Enforcement of Non-Instructional Time | | Ineffective | Developing | Accomplished | Exemplary |
| Indicator Objectives | | <ul style="list-style-type: none"> • Much instructional time is lost through inefficient classroom routines and procedures. • There is little or no evidence that the teacher is managing individual groups, materials, and/or the handling of materials and supplies effectively. • There is little evidence that students know or follow established routines. | <ul style="list-style-type: none"> • Some instructional time is lost through only partially effective classroom routines and procedures. • The teacher who manages individual groups, materials, and/or the handling of materials and supplies is inconsistent; the result being some disruption of learning. • With regular guidance and prompting, students follow established routines. | <ul style="list-style-type: none"> • There is little loss of instructional time because of effective classroom routines and procedures. • The teacher's management of instructional groups and the handling of materials and supplies are consistently successful. • With minimal guidance and prompting, students follow established classroom routines. | <ul style="list-style-type: none"> • Instructional time is maximized because of efficient routines and procedures. • Students contribute to the management of individual groups, materials, and the handling of materials and supplies. • Routines are well understood and may be initiated by students. |
| <ul style="list-style-type: none"> • Instructional working with the teacher are not productively engaged in contributing to the class. • There are no established procedures for distributing and collecting materials. • Procedures for other routines are out of control. | | <ul style="list-style-type: none"> • Small groups are only partially engaged while not working directly with the teacher. • Procedures for transitions and the distribution/colletion of materials seem to have been established, but their operation is weak. • Disruption occurs without necessity. | <ul style="list-style-type: none"> • The students are productively engaged during most group work. • Transitions between groups and whole group activities are smooth. • Teachers for distribution and collection of materials and supplies work efficiently. • Classroom routines function smoothly. | <ul style="list-style-type: none"> • In addition to the other items of "Accomplished" • Students take the initiative with their classmates to ensure that their time is used productively. • Student initiatives ensure that transitions and other routines are streamlined smoothly. • Students take initiative in distributing and collecting materials efficiently. | |

2D - Managing Student Behavior *

Charlotte Danielson's Framework for Teaching, 2011

Domain 2: The Classroom Environment

Model for Kentucky Department of Education

| 2D - Managing Student Behavior | In order for students to be able to engage deeply with content, the classroom environment must be orderly, the atmosphere must feel both safe and productive, without testing and pressure. In general, the classroom standards of conduct are low. In student-friendly ways they are permitted to do and what they can expect of their classmates. Even when their behavior is being restricted, students feel respected, their dignity is not undermined. Skilled teachers report positive student behavior not as a yardstick, but as a permeable background of engagement in content. |
|--|---|
| <ul style="list-style-type: none"> • Description • Monitoring of Student Behavior • Response to Student Misbehavior | <p>Ineffective</p> <ul style="list-style-type: none"> • There appear to be no established expectations and/or the teacher is unable to enforce them and/or • Student challenge the standards of conduct • In response to student misbehavior, the teacher's response is ineffective or disrespectful of student dignity <p>Critical/At-Risk</p> <ul style="list-style-type: none"> • The classroom environment is chaotic, with no accepted standards of conduct. • The teacher does not monitor student behavior • Some students violate classroom rules, without apparent teacher awareness • When the teacher notices student misbehavior, the teacher believes nothing about it <p>Exemplary Examples</p> <ul style="list-style-type: none"> • Students are talking among themselves, and no attempts by the teacher to silence them • An object has brought to class, without teacher notice • Students are moving around the room, the result being a chaotic environment • There is chatter and other distractions during student oral presentations |
| | <p>Developing</p> <ul style="list-style-type: none"> • Some standards of conduct appear to have been established, but their implementation is inconsistent • In school rules, with classroom rules, to monitor student behavior and respond to student misbehavior • There are consequences implemented and the standards of conduct <p>Critical/At-Risk</p> <ul style="list-style-type: none"> • Teacher attempts to establish order in the classroom, without consistent, established conduct, if they occur, is not consistent • Teacher attempts to keep track of student behavior, but only on apparent terms • The teacher's response to student misbehavior is inconsistent, at times only having consequences <p>Exemplary Examples</p> <ul style="list-style-type: none"> • Disciplinary rules are posted, but neither teacher nor students refer to them • The teacher immediately asks students to take their seats, they groan but do not get up to see student, "Where's your top seat? Go to the other side." To correct, "You need to see which seat? There is one and the other one, you're mixed enough already" |
| | <p>Accomplished</p> <ul style="list-style-type: none"> • Student behavior is generally appropriate, the teacher monitors student behavior against established standards of conduct • Teacher's response to student misbehavior is consistent, proportionate, respectful to students, and effective <p>Critical/At-Risk</p> <ul style="list-style-type: none"> • Standards of conduct appear to have been established • Student behavior is generally appropriate • The teacher frequently monitors student behavior • Teacher's response to student misbehavior is effective • Teacher effectively ignores behavior <p>Exemplary Examples</p> <ul style="list-style-type: none"> • Upon a moment of signal from the teacher, students correct their behavior • The teacher moves to every portion of the classroom, keeping a close eye on student behavior • The teacher gives a student a hand pass, and the student then talking to his neighbor |
| | <p>Exemplary</p> <ul style="list-style-type: none"> • Student behavior is entirely appropriate • Students take an active role in monitoring one another's behavior and that of other students, giving students feedback • Teacher's monitoring of student behavior is subtle and non-intrusive • Teacher's response to student misbehavior is sensitive to individual student needs and respects students' dignity <p>Critical/At-Risk</p> <ul style="list-style-type: none"> • In addition to the standards of conduct • Student behavior is entirely appropriate, more than a mere list of do's and don'ts • The teacher monitors student behavior without monitoring - just making about • Teacher is particularly interested in appropriate with students to ensure compliance with standards of conduct <p>Exemplary Examples</p> <ul style="list-style-type: none"> • A student suggests a revision to one of the classroom rules • The teacher notices that some students are talking among themselves and without a word makes a move to them, the talking stops • The teacher asks to speak to a student privately about misbehavior • A student reports to her discussion of the hour of class is over |

3A - Communicating with Students *

Grade 6 English Language Arts, 2013

Domain 3: Instruction

Adapted for Kentucky Department of Education

| <p>3A - Communicating with students</p> <ul style="list-style-type: none"> • Explanation of lesson • Instructional procedures • Explanation of content • Use of the appropriate language | <p>Teachers communicate with students for varied independent, but related purposes, and they convey that teaching and learning are purposeful activities they make that purpose clear to students. They also provide clear directions for classroom activities, so that students know what to do that they are to do. When teachers present concepts and information, those presentations are made with accuracy, clarity, and imagination. When expanding upon the topic is appropriate to the lesson, skilled teachers embellish their explanations with analogies, metaphors, and linking them to students' interests and prior knowledge. Teachers occasionally withhold information from students (for example, in an inquiry lesson) to encourage them to think on their own, but what information they do convey is accurate and reflects deep understanding. The teacher's use of language is clear, rich and often lively, allowing the opportunity for students to use language well and to extend their own vocabularies. Teachers present complex concepts in ways that provide scaffolding and access to students.</p> | | | |
|---|---|---|--|---|
| | <p>Ineffective</p> <ul style="list-style-type: none"> • The instructional purpose of the lesson (what is students, and the directions and procedures are conveying. • The teacher's explanation of the content is both unclear and • The teacher's use of written language contains errors. • The teacher's use of spoken language contains errors of grammar or syntax. • The teacher's vocabulary is inappropriate, vague, or used incorrectly, leaving students confused. | <p>Developing</p> <ul style="list-style-type: none"> • The teacher's attempt to explain the instructional purpose is only partially successful, and/or directions and procedures are not clearly explained to students. • The teacher's explanation of the content is somewhat clear, but contains some errors. • The teacher's explanation contains a few mistakes, with some errors in the content that are not clearly explained. • The teacher's spoken language is correct, however, there are occasional errors or vagueness in the teacher's use of vocabulary. | <p>Accomplished</p> <ul style="list-style-type: none"> • The teacher clearly communicates instructional purpose of the lesson, including where it is situated within the broader lesson and explains procedures and directions clearly. • The teacher's explanation of content is well understood, clear, and accurate, and connects with students' knowledge and experiences. • During the explanation of content, the teacher invites student intellectual engagement. • The teacher's spoken and written language is clear and correct and uses vocabulary appropriate to the standards and interests. | <p>Exemplary</p> <ul style="list-style-type: none"> • The teacher links the instructional purpose of the lesson to the students' interests, the objectives and procedures of the lesson and what is possible for student understanding. • The teacher's explanation of content is both engaging and clear, leading to deep student understanding through and scaffolding, and connecting with students' interest. • Students continue to extend their content understanding, explain concepts in their own words. • The teacher's spoken and written language is appropriate, and the teacher fully explains the content to extend students' vocabularies. |

3B - Using Questioning and Discussion Techniques *

Florida Framework's framework for teaching 2017

Domain 3: Instruction

Adapted by Kentucky Department of Education

| | | | |
|---|---|---|--|
| <p>4d - How frequently used</p> <p>Discussion Techniques</p> <ul style="list-style-type: none"> • Quality of Questions/Responses • Quantity • Techniques • Student Participation | <p>Questioning and discussion are the only instructional strategies specifically referred to in the framework for teaching. This fact reflects their central importance to teachers' practice. But in the framework, it is important that questioning and discussion are used as techniques to deepen student understanding, are recognized rather than serving as reception and verbalization, avoid rote responses as well as rote repeat questions, framed in such a way that they increase students' ability to handle different types of these, make connections, or challenge previously held views. Students' responses to questions are valued, effective teachers are especially adept at responding to and building upon student responses, and making use of their ideas. High quality questions encourage students to make connections among concepts or events previously believed to be unrelated, and strive at new understandings of complex material. Effective teachers also pose questions for which they do not know the answers. Even when a question has a limited number of correct responses, the question being not formulaic, is likely to promote thinking by students. Class discussions are animated, engaging all students in important issues and in using their own long legs to deepen and extend their understanding. These discussions include leveled questions formulated by the students themselves. Most questions used to set high cognitive level in order for a teacher's performance to be rated at a high level, that is, when exploring a topic, a teacher might begin with a series of questions of low cognitive challenge to provide a review, or to ensure that everyone in the class is "on board." Furthermore, if the questions are at a high level, but only a few students participate in the discussion, the teacher's performance on the component cannot be judged to be at a high level. In addition, in lessons involving students in small groupwork, the quality of the students' questions and discussion on their small group may be considered part of the response. In order for students to formulate high level questions, they must have been asked to do so. Therefore, high level questions from students, either in the full class, or in small group discussion, provide evidence that these skills have been taught.</p> | | |
| <p>Ineffective</p> <ul style="list-style-type: none"> • Teacher's performance allows neither challenge, nor prompts unique responses, and the level of cognitive challenge is low. • Interaction between teacher and student is predominantly rote and formulaic, with the teacher reciting all questions and answers. • All the students demonstrate the discussion. | <p>Developing</p> <ul style="list-style-type: none"> • Teacher's questions and answers through a single prompting, with answers seemingly rote and formulaic. • Occasionally, the teacher asks questions where some questions designed to promote student thinking and understanding, but only a few students are involved. • Teacher attempts to engage all students in the discussion and to encourage them to respond to one another, but with uneven results. | <p>Accomplished</p> <ul style="list-style-type: none"> • Although the teacher may use some low-level questions, he or she uses the student questions designed to promote thinking and understanding. • Teacher creates a positive discussion among students, involving adequate time for students to respond and display their own responses. • Teacher successfully engages most students in the discussion, employing a range of strategies to ensure that most students are heard. | <p>Exemplary</p> <ul style="list-style-type: none"> • Teacher asks a variety of types of questions or prompts to challenge students cognitively, encourage higher level thinking and discussion, and promote and support student thinking and understanding. • Students formulate using questions, debate topics, and make connections with lessons and topics presented in other courses and beyond the classroom. |

3C - Engaging Students in Learning *

mid-21st-century framework for teaching 2011

Common Core version

Adapted for Kentucky Department of Education

| | | | |
|--|---|--|--|
| <p>3C - Engaging Students in Learning</p> <ul style="list-style-type: none"> • Learning and Acquisition • Grouping of Students • Instructional Materials and Resources • Instruction and Pacing | <p>Student engagement in learning is the centerpiece of the framework for teaching, and other components contribute to it. When students are engaged in learning, they are not merely “being” nor are they “being told.” The critical distinction between a classroom in which students are disengaged and being told and in which they are engaged is that in the latter, students are developing their understanding through what they do. First, they are engaged in discovering, debating, comparing, debating, comparing, debating, comparing, discovering patterns, and the like. They may be solving their work from a range of teacher-arranged) classes and making important contributions to the intellectual life of the class. Each student does typically assume the role of a learner, but they are essential components of expertise.</p> <p>A lesson in which students are engaged usually has a discernible structure: a beginning, a middle, and an end, with scaffolding provided by the teacher or by the activities themselves. The teacher organizes student tasks to provide cognitive challenge and then encourages students to reflect on what they have done and what they have learned. This is, the lesson has closure, in which students derive the important learning from their own activity. A critical element for the teacher is determining the degree of student engagement is, “What are the students being asked to do?” If the answer to that question is that they are filling in blanks on a worksheet or performing a rote procedure, they are unlikely to be engaged in learning. In contrast, it is essential not only to watch the teacher but also to pay close attention to the students and what they are doing. The best evidence for student engagement is what students are saying and doing as a consequence of what the teacher does, or has done, or has planned.</p> | | |
| <p>Ineffective</p> <ul style="list-style-type: none"> • The learning tasks and activities, materials, resources, instructional groups and technology are poorly aligned with the instructional objectives or requirements of the classroom. • The pace of the lesson is too slow or too rushed. • Few students are consistently engaged or interested. | <p>Developing</p> <ul style="list-style-type: none"> • The learning task and activities are primarily aligned with the instructional objectives but rarely fully meet all those set by students, allowing most to be passive or merely competent. • The pacing of the lesson may not provide so flexible time needed to be intellectually engaged. | <p>Accomplished</p> <ul style="list-style-type: none"> • The learning tasks and activities are aligned with instructional objectives and designed to challenge student thinking. The result being that most students display active intellectual engagement with the subject and thinking content and are supported in that engagement by teacher scaffolding. • The pacing of the lesson is appropriate, providing most students the time needed to be intellectually engaged. | <p>Exemplary</p> <ul style="list-style-type: none"> • Virtually all students are intellectually engaged in challenging content through well-designed learning tasks and activities scaffolding by the teacher and fully aligned with the instructional objectives. • In addition, there is evidence of some student initiative or inquiry and student contribution to the resolution of important content. • The pacing of the lesson provides students the time needed to intellectually engage without reflect upon their learning and to consolidate their understanding. • Students may have to be checked on how they complete tasks and support is necessary for any student. |

3D - Using Assessment in Instruction *

Charlotte-Davidson's Framework for Teaching, 2011

Domain 3: Instruction

Adapted for Kentucky Department of Education

| | | | |
|---|--|--|---|
| <p>3D - Using Assessment in Instruction</p> <ul style="list-style-type: none"> Assessment Criteria Measuring of Student Learning Assessing to Inform Formative Use of Assessment Assessment and Monitoring of Progress | <p>Assessment of student learning plays an important role in the effectiveness of the model of instruction. It is now recognized to be an integral part of instruction. While assessment for learning has always been and will continue to be an important aspect of teaching of importance for teachers, to know whether students have learned what was intended, assessment for learning has increasingly come to play an important role in classroom practice. And in order to assess student learning for the purposes of instruction, teachers must take their "finger off the pulse" of a lesson, monitoring student understanding and, where appropriate, offering feedback to students. Of course, a teacher's monitoring of student learning, though the action may superficially appear to be the same as that of monitoring student behavior, has a fundamentally different purpose in each case. When teachers are monitoring behavior, they are alert to students who may be talking to their neighbors, or looking at their neighbors, when teachers are monitoring student learning, they look carefully at what students are writing, or listening intently to the questions students ask, in order to gauge whether they require additional activity or explanation in order to grasp the content. In each case, the teacher may be circulating in the room, but higher purposes in doing so are quite different in the two situations. Similarly, on the surface, questions asked of students for the purpose of monitoring learning are fundamentally different from those used to build understanding in the lesson; teachers are alert to students' revealed misconceptions, whereas in the latter the questions are designed to expose relationships or deepen understanding. For the purpose of monitoring, many teachers create questions specifically to determine the extent of student understanding and use techniques (such as exit tickets) to ascertain the degree of understanding of every student in the class. Indeed, encouraging students (and actually teaching them) the necessary skills of monitoring their own learning against clear standards is demonstrated by teachers at high levels of performance.</p> | | |
| <p>Ineffective</p> <ul style="list-style-type: none"> There is little or no assessment or monitoring of student learning; teachers do absent or of poor quality. Students do not appear to be aware of the assessment criteria and do not engage in self-assessment. | <p>Developing</p> <ul style="list-style-type: none"> Assessment is used sporadically by teacher and/or students to support instruction. The frequency, monitoring of progress in learning. Feedback to students is general; students appear to be only partially aware of the assessment criteria used to measure their work, and few assess their own work. Questions, prompts, and assessment techniques used to diagnose students' learning. | <p>Accomplished</p> <ul style="list-style-type: none"> Assessment is used regularly by teacher and/or students during the lesson through monitoring of learning progress and results in general, specific feedback that advances learning. Students appear to be aware of the assessment criteria, some differentiate their self-assessment. Questions, prompts, assessment results are used to diagnose students' learning. | <p>Exemplary</p> <ul style="list-style-type: none"> Assessment is fully integrated into instruction through extensive use of formative assessment. Students appear to be aware of, and there is some evidence that they have contributed to the assessment criteria. Students set goals and monitor their progress. A variety of teachers, not just their teacher and their peers, is assessing, assessing, and advanced learning. Questions, prompts, assessment results are used regularly to diagnose students' learning in individual students. |

4A - Reflecting on Teaching *

Charlotte-Mecklenburg Schools Framework for Teaching, 2011

Domain 4: Professional Responsibilities

Adapted for the Biology Department of Education

| 4A - Reflecting on Teaching | Reflecting on teaching encompasses the teacher's thinking that informs any instructional event – an analysis of the many decisions made, both in planning and implementation of a lesson. By considering these elements in light of the impact they had on student learning, teachers can determine where to focus their efforts in making lessons and what aspects of the instruction they will continue in future lessons. Teachers may reflect on their practice through collegial conversations, journal writing, examining student work, interviews, observations, and conversations with students, or simply thinking about their teaching. Reflecting with accuracy, specificity, and ability to use what has been learned in future teaching is a learned skill; mentors, coaches, and supervisors can help teachers acquire and develop the skill of reflecting on teaching through supportive and deep questioning. Over time, this way of thinking and analyzing instruction through the lens of student learning becomes a habit of mind, leading to improvement in teaching and learning. |

Adapted for Technology Department of Education

| <p>4D - Participating in a Professional Community</p> <ul style="list-style-type: none"> Relationships with Colleagues Development of a Culture of Professional Inquiry Service to the School Participation in School and District Projects | <p>Schools are, first of all, environments to promote the learning of students. But in promoting student learning, teachers must work with colleagues to share strategies, plan joint efforts, and plan for the success of individual students. Schools are, in other words, professional organizations for teachers—organizations whose full potential is realized only when teachers regard themselves as members of a professional community. This community is characterized by mutual support and respect and by recognition of the responsibility of all teachers to be constantly seeking ways to improve their practice and to contribute to the life of the school. Invariably, teachers' duties extend beyond the doors of their classrooms and include activities related to the entire school and/or the larger district. These activities include such things as school and district fund-raising committees or management with the parent teacher organizations. With equanimity, teachers assume leadership roles in these activities.</p> | <i>Ineffective</i> | <i>Developing</i> | <i>Accomplished</i> | <i>Exemplary</i> |

4F - Demonstrating Professionalism *

Ontario Education's Framework for Teaching, 2012

Domain 4: Professionalism

Adapted for Kentucky Department of Education

| <p>4F - Showing Professionalism</p> <ul style="list-style-type: none"> • Integrity and Ethics • Career Advancement • Advocacy • Professional Learning • Compliance with Ethical and Legal Requirements | <p>Highly effective teachers demonstrate professionalism in a variety of ways that benefit students and the profession. Teaching at the highest level of performance in this component is a varied, balanced, and ongoing process that requires a high level of self-reflection and a commitment to continuous improvement. Accomplished teachers have a strong moral compass and are guided by what is the best interest of students. Self-reflection is displayed in a number of ways. For example, they conduct self-reflection with colleagues within the school. They know their strengths and weaknesses and seek out resources to improve their teaching practice that may extend beyond the classroom. Teachers advocate for their students in ways that might challenge traditional ways and the educational establishment, seeking greater flexibility in the way school rules and policies are applied. These dedicated educators also display their professionalism in a variety of ways by approach professional development and learning, seeking ways that best serve students. Finally, teachers consistently adhere to school and district policies and procedures that are willing to work to improve those that might not be the most effective.</p> <table border="1"> <thead> <tr> <th data-bbox="284 420 519 441">Ineffective</th> <th data-bbox="519 420 755 441">Developing</th> <th data-bbox="755 420 990 441">Accomplished</th> <th data-bbox="990 420 1222 441">Exemplary</th> </tr> </thead> <tbody> <tr> <td data-bbox="284 441 519 690"> <ul style="list-style-type: none"> • Teacher displays a strong understanding of the profession and its standards. • Teacher is not always proactive in seeking out professional learning opportunities. • Teacher makes limited and inconsistent use of professional learning opportunities. </td> <td data-bbox="519 441 755 690"> <ul style="list-style-type: none"> • Teacher is aware of professional standards and expectations of the profession. • Teacher complies with professional standards and expectations. • Teacher is committed to professional learning opportunities. • Teacher complies with school and district policies and procedures. </td> <td data-bbox="755 441 990 690"> <ul style="list-style-type: none"> • Teacher displays high standards of honesty, integrity, and ethical conduct. • Teacher is active in seeking out professional learning opportunities. • Teacher maintains an open mind in terms of professional development. • Teacher complies fully with school and district regulations. </td> <td data-bbox="990 441 1222 690"> <ul style="list-style-type: none"> • Teacher takes a leadership role in seeking out professional learning opportunities. • Teacher is highly proactive in seeking out professional learning opportunities. • Teacher makes a concerted effort to challenge the profession in a way that is in the best interest of students. • Teacher complies fully with school and district regulations, taking a leadership role with colleagues. </td> </tr> </tbody> </table> | Ineffective | Developing | Accomplished | Exemplary | <ul style="list-style-type: none"> • Teacher displays a strong understanding of the profession and its standards. • Teacher is not always proactive in seeking out professional learning opportunities. • Teacher makes limited and inconsistent use of professional learning opportunities. | <ul style="list-style-type: none"> • Teacher is aware of professional standards and expectations of the profession. • Teacher complies with professional standards and expectations. • Teacher is committed to professional learning opportunities. • Teacher complies with school and district policies and procedures. | <ul style="list-style-type: none"> • Teacher displays high standards of honesty, integrity, and ethical conduct. • Teacher is active in seeking out professional learning opportunities. • Teacher maintains an open mind in terms of professional development. • Teacher complies fully with school and district regulations. | <ul style="list-style-type: none"> • Teacher takes a leadership role in seeking out professional learning opportunities. • Teacher is highly proactive in seeking out professional learning opportunities. • Teacher makes a concerted effort to challenge the profession in a way that is in the best interest of students. • Teacher complies fully with school and district regulations, taking a leadership role with colleagues. |
