RE: Building Modifications – Security Upgrades at Riverview Opportunity Center & Bullitt Alternative Center

Presented for Board approval is a request to add security vestibules at the Riverview Opportunity Center and the Bullitt Alternative Center.

Currently, these facilities are the only school buildings without the additional security measures in the district. Approving this project will provide consistency and uniformity to the level of security afforded to each of our schools. The approximate cost for architectural services and construction for the buildings totals \$60,000.00. Funding is located in the General Fund under Unassigned Funds and will be designated to cover the cost of each project.

Upon approval, a BG-1 will be generated for the project and submitted to KDE as per their requirements. Additionally, the district will enter into an agreement for architectural services with Studio Kremer Architects to design and oversee the projects. The costs associated with architectural services will be negotiated with Studio Kremer Architects following KRS and KDE guidelines as the total cost of the project is below \$1,000,000.00.

I recommend the Board approve the request to add security vestibules at Riverview Opportunity Center and the Bullitt Alternative Center.
