Students will receive instruction, from Engineers, over the operation of the Ohio Falls Hydroelectric plant. After a class discussion, the students will break down into two smaller groups and tour the plant. They will be provided with Personal Protective Equipment for their safety. SAFETY First!

HS-ESS3-2 Evaluate competing design solutions for developing, managing, and utilizing energy and mineral resources based on benefit ratios

HS-ESS3-4 Evaluate or refine a technological solution that reduces impacts of human activities on natural systems.

HS-ETS1-3 Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts.

ESS3.C:Human Impacts on Earth SYstems

\*The sustainability of human societies and the biodiversity that supports them requires responsible management of natural resources

\*Scientists and engineers an make major contributions by developing technologies that produce less pollution and waste and that preclude ecosystem degradation
