Re: Acceleration of a Kindergarten Student

In accordance with Senate Bill 35 it is required to have board approval to move a kindergarten student for the purposes of state funding due to kindergarten being half day. Leela Schroerlucke has completed the required assessments and met the criteria for acceleration at the district level according to BCPS district policy and procedure. Board approval for kindergarten students to accelerate grades is an additional step required by the state. Upon board approval, we will be allowed to fill out the KDE Accelerated Placement Request Form and move forward with accelerating this student.
