Anatomical models will allow my student to manipulate and see structures that are only seen online or in texts. Anatomical models will deepen my students understanding of form and function. Pictures can show details and begin to allow students to recognize structures however, a model can do so much more for a student than a picture can. With these models, I will be able to increase understanding during lecture and labs.

performance expectation that students can plan and conduct an investigation of properties of water and its effects on Earth's material and surface processes. The students will be able to compare data and analyze their results to learn about weathering, erosion, and deposition. This is a standard that is taught in the introductory chemistry class.

With these kits, students will be able to design their own investigations which will allow them to have an engaging hands-on experience.

Our school does not currently have a lab investigation to explore this earth science standard in chemistry. The addition of this activity will allow students to enhance their data analysis and critical thinking skills.

Mrs. Stoelb posted an update

Scientific calculators are the only calculator allowed in dual enrollment. They are not allowed to use a graphing calculator like the math teachers have. This will keep the students from having to buy them. They have already had to spend money on their class.

These materials will help students during school.

See the World Through My Eyes

Help me give my students the ability to share their school-related experiences and perspectives in an easy and fun way!

My Students

Our high school students are incredible creators! Many of my students love to write, play music, sing, act, and engage in community service. Several students describe Digital Journalism class as a place of therapy and liberation from the everyday concerns that can be extremely demanding and depleting from time to time.

Due to my students' overall appreciation of the arts and humanities, it is a necessary goal to offer them space and the opportunity to continue creating and expressing their unique world perspectives.

My Project

A couple of Instax cameras and some film to go with it will allow all members of our school's student body to check out a camera, take a picture of a school-related event they have participated in or experienced, and then share with their point of view with the entire school.

The creative uses for these cameras are literally endless.

Growing Our Future

Help me give my students pruners, gardening wheelbarrow and a garden cart. These supplies will help my students run a community greenhouse business

My Students

My students are enrolled in agriculture classes to understand and learn modern production practices. We learn how to efficiently produce sustainable food that will continue to feed a growing population on a decreased amount of land.

These students will be responsible for feeding future generations with less inputs in a sustainable, environmentally friendly way.

While some students want to be a veterinary or geneticists; others are simply interested in learning where their food comes from.

My role in this classroom is to expose students to a changing agriculture world. As our consumers continue to demand more out of their food; we must meet that demand with new, innovative ideas.

My Project

These items will help with the day to day operations of our high school greenhouse. The greenhouse provides vegetable plants, landscape plants, and hydroponic lettuce to our community annually. These supplies will allow us to do this task more efficiently.

Mrs. Probst

More than half of students from low-income households

1 donor has given to this project.

This project will reach 175 students.

Keep the momentum going! Make a donation to Mrs. Probst for her next project!

\$

Give

The wheel barrow and garden carts will be utilized to transport plants to and from the greenhouse to the headhouse and propagation chambers.

Using the students to work the greenhouse provides students with a work ethic, employability skills, customer service skills, and an overall appreciation for the land.

More than half of students from low-income households

2018

Thank you for the funding! I appreciate your financial dedication to my classroom, and other classrooms through the country! These items will be utilized to ensure students understand how food is produced, how to grow their own food, and the importance of agricultural education. Because of people like you we have an opportunity for students to learn through a hands on approach.

With gratitude,
Mrs. Probst
