**Subject:** Profile of a Graduate

Simpson County Schools has been intently focused on creating a Profile of a Graduate. This profile will not only visually represent expectations for students but also provide a pathway of success. During the 2018-2019 school year, educational stakeholders and community partners have collaborated to create a visual profile that would be able to represent all SCS students. Beginning in 2019-2020, focus groups will be created to further explore and define each graduate competency. This work will also include identifying next grade readiness benchmarks for grades K-8.
