Re: Building a Basketball Court on the Playground  
Date: June 12, 2019

Lincoln Elementary would like permission to build a basketball court with goals at the end of the playground. I have been in consultation with Mr. Delk and Mr. White concerning the matter. Mr. Mike Chaffin quoted the cost of the concrete and materials to do the work. This has been a request by students for the last two years especially since they are accustomed to having a court at Simpson Elementary.

This will be a project that will be funded by our local PTO and funds that students earned by running the Lincoln Elementary School Store. Please take this request into consideration since this is an important recreational activity for many students.
