PERIMETER VIEW 360 DEGREE CAMERA SYSTEM
Provides a 360 degree "Bird's Eye View" to increase safety by reducing blind spots. Video from wide angle cameras mounted on the four sides of the bus are "stitched" together with software to give the driver a view that appears from above showing 360-degrees around the bus. A 10" monitor hidden behind the 10" x 30" review mirror provides this 360-degree view and can be controlled to turn on/off with triggers. Common triggers are reverse lights, entry doors, and/or directional lights. Also, the 360-degree view can be recorded to many existing or added DVRs even when the triggers have the monitor turned off. Installation labor quoted on vehicle size.
