Library	Mental Health: Let's Keep the Conversation Going What is causing the influx of mental health issues in education? How can we as educators help our students? If you attended the mental health session at our first Wildcat Summit, we will refresh and move into a more detailed discussion. If this is your first time, join us, as we will do a quick catch-up. Participants will receive a brief overview of mental health illnesses that are commonly diagnosed in children and adolescents, learn how teachers can incorporate strategies for students with mental health issues in the classroom, and have a discussion time for educators to ask questions. 105	Taming the Beast of Perfectionism Many students (and adults!) struggle with the beast of perfectionism, which left unchecked can lead to self-defeating negative thoughts, heightened levels of stress, and damage to personal and professional relationships. Learn about different forms of perfectionism, the mindsets that underly perfectionistic behaviors, and strategies to help your students (and possibly even yourself) deal with perfectionistic tendencies in a healthier way. 122	Classroom Management	Classroom Management	How a Mathematical Concept Evolves through the Curriculum	Run The Race: Writing Strategy
	Basic nuggets for classroom management.	Basic nuggets for classroom management.	The concepts of Area and Rate of Change will be explained throughout the curriculum from their occurrences in the Standards from elementary school to high school. The goal is to develop of better understanding of how each iteration of a concept is connected for students.	This session will focus on the importance of teaching our students a consistent writing strategy that they can use across content areas. During this session you will learn what Run the Race is and how you can apply the strategy in your classroom. We will also spend some time walking each participant through the writing process in an hands on environment.
