
MEMORANDUM

TO: Simpson County Principals and District Administrators

FROM: Tim Schlosser

DATE: November 8, 2019

SUBJECT: Recommended Needs Assessment Report for 2020-2021 Budget

Two important analysis activities at your school or in your program(s) should be initiated and in progress at this time of the budget process. First, are the programs and staff levels in place accomplishing the goals and objectives for which they were established? Data to inform this analysis could include Unbridled Learning/K-PREP results, student performance on other learning measures (e.g., grades or performance on other standardized assessment instruments –STAR/EPAS/Learning Checks), survey feedback information from clients, formal and informal evaluations by teachers and administrators. Second, what needs are perceived by school staff and other clients? In short, has the school effectively translated its improvement plan into budget language? The results of an analysis of the improvement strategies into budget language should provide important information for the review of current programs and generate a statement of prioritized goals for the short and long range future.

Program evaluation and planning activities should generate a statement of possible program changes and strategies to improve student learning at your school. This means that schools must evaluate and plan very wisely and make informed decisions about the best way to apply limited dollars that will bring about improved learning.

As the Board of Education proceeds through the 2020-2021 budget process, it is important that the board members receive a needs assessment of school improvement strategies identified by each school council. You and your council, budget committee, and staff should review your 2019-2020 needs assessment report as to level of funding and whether new items should be added or prior un-funded items removed. Estimated costs should be determined for every identified need and the needs should be listed in priority order for each school. It is recommended that councils limit the number of un-funded needs on the summary to the top 5-7 identified by the school rather than presentation of an exhaustive list with an impossible cost. A column for the priority assigned for each item is on the needs assessment report form. It is also important to note that should the Board decide to provide funding for specific needs in section 7 of the SBDM allocation, such allocation is limited to **needs identified by the council (702 KAR 3:246)**. The certification on the needs assessment form is to indicate that the council affirms identification of the needs reported.

The needs assessment report form for your school or program is attached. Following the internal needs assessment, your school council should take action to approve the school's 2020-2021 needs assessment. The approved needs assessment report is to be sent to the Superintendent by March 31, 2020.
