## DATA NOTES:

A complete statewide dataset was provided to CEPR by Cayen Systems, Inc. The first request was made on July 23, 2019 and subsequent requests between August 14, 2019 and November 4, 2019.

Site level data are compared to data from the prior year if programming was provided in that year. In some cases, percentages round to 0 (e.g., 1 out of 300).

Analysis was not performed on program outcomes for sites reporting grades or teacher surveys for less than 50% of students attending 30+ days during the school year.

Students with unknown grade level or at-risk demographic category specifications are included in the analysis. For example, in the Cayen system, grantees may select “unknown” as a designation in these categories.

\* The total # of summer and school year students does not equal the total # of summer students plus the total number of school year students because students may have attended both.

\*\*The Teacher Survey represents the proportion of students who improved behavior relative to the number of students rated as needing to improve. Students rated by teachers as "Did Not Need to Improve" are excluded from these calculations.

\*\*\*Data is self-reported and comes from the KY 21<sup>st</sup> CCLC Data Verification 18-19 Form that was administered to grantees.
