

The attached spreadsheet shows attendance through month 6 compared to the previous year, and the 3, 5, and 10 year averages.

Our attendance goal is to be between 94.5% and 95% as a district. We are currently at 94.39%. Everyone is aware that we have struggled with illness since Christmas Break, but overall we seem to be on the upswing.

2 years ago we were at 94.38% at the end of month 6 and we finished the year at 94.33%. We definitely have an uphill battle in front of us to get back in the range we want to be in. However, with a strong finish we could get close.
