LOAN INFORMATION

LOAN BALANCE COMPUTATION METHODS

Daily Balance Method (Including current transactions). We figure the finance charge on your account by applying a daily periodic rate to the daily balance in your account each day (including current transactions). The finance charge equals the sum of this product for each day in the billing cycle. To get the daily balance we take the beginning balance of your account each day, add any new purchases/advances/loans, and subtract any payments or credits.

Average daily balance method (Including current transactions). [If under the Periodic Disclosure Information portion of your statement an "Average Daily Balance" is indicated, then this is the balance computation method that applies to your account] We figure the finance charge on your account by applying the daily periodic rate to the "average daily balance" of your account (including current transactions). We then multiply this product by the number of days in the billing cycle. To get the "average daily balance" we take the beginning balance of your account each day, add any new purchases/advances/loans, and subtract any payments or credits. This gives us the daily balance. Then, we add up all the daily balances for the billing cycle and divide the total by the number of days in the billing cycle. This gives us the "average daily balance."
