2020 IRP Website

The screenshot displays the KYMEA website's navigation bar and main content area. The navigation bar includes links for ABOUT, KY COVID-19 RESOURCES, POWER RESOURCES, IRP ROADMAP, COMMUNITY, NEWS, INFORMATION, and CONTACT. A red arrow points from the 'POWER RESOURCES' link to the 'IRP ROADMAP' dropdown menu, which is open and shows a list of links: IRP Home, IRP Roadmap Timeline, Participant Resources, IRP FAQs, and IRP Feedback.

THE INTEGRATED RESOURCE PLANNING ROADMAP

At KYMEA, resource planning is a continuous process. KYMEA develops its Integrated Resource Plan (IRP) to guide the Agency's near- and long-term direction, strategy, and subsequent actions. The IRP assists the Agency in ensuring it has put together a portfolio to provide an ample supply of reliable and environmentally sensible power supply at stable and competitive rates in a fiduciarily responsible manner to its members.

WHAT IS AN INTEGRATED RESOURCE PLAN (IRP)?

KYMEA's IRP is a comprehensive decision roadmap for meeting the Agency's objective of providing reliable and low-cost power to our member communities while addressing the substantial risks and uncertainties inherent in the electric utility business. The IRP examines foreseeable future resources with regard to power plants, transmission investment, purchase power agreements, and end users. The IRP outlines the necessary actions to enable the Agency to continue providing our member communities with electricity and addresses contributing factors that impact power supply and transmission, ranging from government regulations and expectations at both federal and state levels.

KYMEA will develop a model input and framework, to identify scenarios, resource options and business strategies to evaluate how a future portfolio might change under various conditions. Throughout the process, KYMEA's vision, mission, and values will play a tremendous role as decisions are made that support
