Facilities, Transportation, and Safe Schools

Transportation:

- No issues at this time with transportation.
- One driver still being utilized for food delivery.

Facilities:

- The ceiling tile in NHS hallways is being replaced. Thanks to custodial staff at NHS for assisting.
- Maintenance dept will be out at varying times during the month of June for X and vacation days, so limited work will be taking place as far as they are concerned.
- Rooms are being moved out in preparation for painting of rooms at NHS and other work.
- Air Handling Unit at NIS went down and we had to replace two motors which should be done in the next week so NIS will have AC.
- Other facility work is progressing at this point.
- Turf at the stadium was examined and we will need to repair a couple of spots but nothing major.
- Working with Hayes and Associates on the fire panel at NPS. We had such a range of estimates we wanted to make sure we are meeting the state guidelines as we move forward.

Safe Schools

- Met with Fred Scroggins the state compliance officer assigned to this region. We toured all the schools and went through each Risk Assessment completed by the schools. While there are a few items we need to refine we had a very good walkthrough. Officer Scroggins will be returning unannounced later this year for a formal walkthrough that will be reported. Thanks to each of the schools and administrators for their work and the feedback they provided on the walkthrough.
- At the direction of Mr. Watts, I ordered another 3,000 masks. Waiting on additional hand sanitizer to arrive. We plan on meeting in mid-July to determine what other items we may need as we move into the next school year. However, we don't want to have a huge stockpile and then not utilize it.
