SUBJECT: Farm to School Program

The Kentucky Department of Agriculture/USDA offers a Farm to School Program. The Farm to School Program enriches the connection the community has with fresh and healthy foods that are produced locally. This program would allow food service to work directly with our local growers to obtain fresh fruits, vegetables and more.

Additionally, our district's food program will be able to partner with The Christian County Extension Office to aid us in reaching out to growers as well as possibly helping with our own school garden endeavors.

I am requesting approval from the Christian County Board of Education to participate in this program from August 1, 2020 to June 20, 2021.

Thank you for your consideration regarding this matter.
