Office of Education Technology - July 2020

Kentucky's K-12 Digital Readiness

We are headed toward greater and more meaningful digital interactions between family, school and community. We believe digital and future-ready foundations can:

- help empower student personalized learning experiences and preparedness for college and the workforce
- increase teacher productivity and digital workflows
- enhance communications and invaluable collaboration models
- expand data enhanced decision making, and
- provide a robust infrastructure for endless possibilities.

Access

Digital access at school and at home helps us understand how “plugged in” and “connected” our learners are during the school day and beyond. Students without access to technology in school and at home are less likely to engage in 21st century learning skills. Ease of access is a precursor to the desired shifts in student outcomes powered by digital tools and resources. Strategies such as 1:1 and Bring Your Own Device (BYOD) are being adopted across Kentucky to help meet this need.

84% - 91% of students have Internet access at home; **93%** of whom have wireless Internet access (**79%** broadband, **14%** cellular).

42	Districts with BYOD only - 24% (69% total)
37	Districts with 1:1 only - 21% (66% total)
78	Districts with both BYOD and 1:1 - 45%
17	Districts without BYOD or 1:1 - 10%

Student to Digital Device Ratio

674,892

Student Instructional Devices

100% of schools provide Wi-Fi access to students

Of these, **97%** schools have implemented dense Wi-Fi networks capable of supporting BYOD or 1:1 initiatives

100%

of Kentucky K12 public schools and district offices are connected by the most reliable, highest speed and quality fiber internet services in the country.

School fiber internet total usage increased

+35%

over the past 24 months while maintaining up time of

99.99%

>260 kbps

Bandwidth per student available through statewide fiber network service

90% of students have a smart-phone. 5% are shared.

Anytime, Anywhere, Always On, Differentiated Teaching and Learning

Future-Ready Student

Strong online skills, such as confidence using shared digital workspaces, have been correlated with increased collaboration in the classroom.

Students can think about concepts and interactions in more varied ways with the affordances of multimedia and multimodal representations.

Students who have access to computers and the Internet are more likely to use technology more frequently and have better technology skills.

These skills are a precursor to the use of digital creativity, digital collaboration, digital communication and critical thinking while learning.

Students can also personalize the use of their technology and leverage greater access to engage in anytime, anywhere learning on topics of their choice.

COLLABORATION & ONLINE SKILLS

Student-reported ease of collaborating using online documents

MULTIMEDIA SKILLS

Student-reported ease of editing a photo

Student-reported frequency of uploading photos from a digital device

Student-reported frequency of downloading or streaming music, podcasts or other audio

FOUNDATIONAL SKILLS

Student-reported ease of connecting devices via bluetooth or wi-fi

Student-reported frequency of reading online content

Student Technology Leadership Program

Future-Ready Teacher

KY is cited as a top 3 state in teachers accessing and using quality data to raise achievement for all students (Data Quality Campaign)

Teachers with strong foundational skills are able to handle administrative classroom tasks easily, including attendance and grading. Further, teachers who are confident in their ability to use foundational skills are often able to use these skills when learning new online and multimedia skills.

PERCEPTION OF DIGITAL SKILLS

Ability to manipulate photos and record and edit audio or video

37% expressed interest in Professional Development (PD) in this area

ONLINE SKILLS

Teacher-reported ease of collaborating using online documents

36% expressed interest in PD in this area

FOUNDATIONAL SKILLS

Basic computing skills - sending email and creating spreadsheets

14% expressed interest in PD in this area

Nearly 4 of 5 (**76%**) teachers report having sufficient access to instructional technology...

yet just over 2 in 5 (44%) have access to an integration specialist or digital learning coach.

92% of these are encouraged to use technology for teaching and learning by school leaders

88% of teachers report the internet speed at school as average or better

of KY teachers believe technology use in class can enhance student learning

CONFIDENCE WITH TECHNOLOGY

77%
can solve their own tech problems

69%
easily find new technologies to meet their teaching goals

Teacher-reported hours spent per year participating in school-sponsored technology related PD

80% of these teachers say the quality is average or above average
