

Larry B. Hammond, Superintendent
Board Report
July 21, 2020

Considering our efforts to develop reopening plans for the 2020 – 2021 school year, I wanted to summarize our current status. Our Back to School Roadmap is included in the agenda for your consideration and approval. This document was developed as a result of your input and our ongoing efforts to evaluate our options for the fall as well as the many challenges that must be considered in order to safely deliver instruction to our students. District administrators along with principals have met for numerous hours to discuss and weigh all variables while making every effort to consider the guidance provided by KDE and the KDP. We condensed the document to make it less burdensome for parents to read and consider in making the best choice for their children. We are anxious to modify the document if needed and make it available to parents at the conclusion of the meeting tonight. We expect to have accurate numbers for planning instruction within the buildings as well as GC@HOME by July 31.

Secondly, I wanted to provide a brief update on the building expenditures included in the bills for payment today.

- Richards Electric will receive a payment of \$291.07 which is their final payment
- Marksbury Cornett Construction LLC will receive a payment of \$100,535.45 with a
 - remaining balance of \$256,676.84
- Clotfelter Samokar will receive a payment of \$2,564.21 with a remaining balance
 - of \$4,615.59
- Ateck will be receiving a payment of \$10,000.00 which is the final payment

We anticipate the building being substantially complete by early August. The major issue continues to be the manufacturing and delivery of entry doors and other doors within the lobby area.
