

# Lincoln Elementary School

## Board Report

### August 2020

- EnVision Math 2020 - Our teachers, staff, and administrators have been trained on using our new math program, *EnVision Math 2020* from Saavas (formerly known as Pearson). The program is a very engaging program that is aligned with the Kentucky Common Core Standards and has both amazing learn at school and learn from home tools. We are thrilled that our students will be exposed to such a wonderful math program that also includes a strong online platform, systematic math interventions (Success Maker), and a thorough consumable math worktext book.
- Orientation Week at Lincoln – Week of August 24<sup>th</sup> - We have invited families in to meet their teachers, receive their learning resources – including their new electronic learning devices (Ipad – preschool through 2<sup>nd</sup> grade; Chromebooks – grades 3 – 6); and to witness firsthand our safety protocols within the classroom and around the school building – signage, mask wearing, socially distanced classrooms, etc. During each meeting the teacher and the family will:
  - spend time getting to know the student
  - actually log onto learning device to access learning program
  - receive additional learning tools – worktexts, manipulative bags, writing journals, etc.
  - learn and see firsthand the safety protocols that we have in place for our safe return back to learning on campus
  - address any other concerns and questions the student and families may have
- The LES Re-entry Team – This team is comprised of ten members of our Lincoln community – teachers, classified staff members, parent, administrators, etc. The purpose of the team is to determine safety protocols and procedures for our return to school. The team has met several times during the last month to discuss, brainstorm, and determine safety procedures and protocols to ensure a safe return to school for both students and staff.
- Online Learning Classrooms – Using Google Classroom, our Lincoln teachers have set-up their learning platforms integrating our well-planned and intentional online learning programs – *Wonders Reading, EnVision Math, Lexia, Freckle Math*, etc. Through these Google Classrooms teachers will be connecting with students, teaching new content, and assessing student learning.
