**Categories:** Only to me

The first step to a successful understanding of Solar for the district is to provide 12 months of Electric Utility bills. This information provides an insight into your Utilities Net Metering law ( Net metering is when solar out produces your building usages at any time and how much the local Utility will pay for the solar power as a credit on your monthly bill) it also so shows your total Energy Consumption and Demand Billing. If we can get this information we can have a very thoughtful conversation on solar power for you buildings. I really appreciate you reaching out to JMS. Chris is a good person and Superintendent.
