Subject: John Walton Tower Generator

Mr. Barrix

We are in the process of decommissioning our equipment at the John Walton Tower site and were concern that your equipment would be left there with NO backup power. We have extended the offer to allow you to take over control of the generator which would be a win for both parties. We will not have to pay the expensive to get the generator out of the shelter and you would have backup power in the future. I have the maintenance record for the last several years and we do two checks a year with one being on FULL load for one hour. Please feel free to call me if you have question and thanks for the opportunity to work with you on this generator.

James N. Staverman
