

Board Report

Jim Seward, District Technology Coordinator
April 2020

Technology Plans

The original due date for Technology Plans was April 30, 2021. This date has been pushed to the end of May. Look for our new overall plan at the May Board Meeting.

End-of-year

With our new 1-1 program, we have to develop new procedures for device collection. I have been working with building principals and NTI teachers to work together to collect devices. Plan is in place and we will adjust and redefine, as necessary.

One-to-One Project

We have recently placed an order for 110 more student devices, to be used in our 1-1 initiative. These devices will be used for 6th and 9th grade students. We will be ordering new iPads for Kindergarten students in July.

Phone System

I have recently placed an order to upgrade the district phone system. Our current system will be in violation of the Baum Act in January 2022. This is a planned upgrade for after hours and/or summer.
