**Subject:** FW: Nucor donation  
**Attachments:** 04A61 (5) Gifts and Donations.docx

Mrs. Lewis and I had conversation earlier today regarding this email. The staff was concerned about the chemicals and were seeking advice/guidance from Mr. Underwood due to Nucor dealing with chemical disposal. In conclusion, he said Nucor would pay for the disposal. GCHS staff did not solicit the gift. That is GREAT news! The preferred date is May 14 which is before the May meeting for board approval to accept the gift. I told her to plan for that date with your knowledge of the happening. I will include the item on the May agenda in the absence of your preference to reject the gift.

The disposal company (Heritage) will submit a bill to the high school and Nucor plans to provide a gift in that amount.

A **GREAT** big **THANKS** to **Mrs. Lewis and Mrs. Howell** for be proactive on the need to remove the chemicals

**Subject:** Nucor donation

Mrs. Howell and I have been working with Patrick Underwood who is an environmental specialist at Nucor and Kyle Turner an associate at Heritage, an environment services and waste management company in regards to the safest and most effective way to dispose of chemicals in our science lab. We met with them today and were given a quote of \$5,000 by Mr. Turner to come and dispose of these chemicals by their company. Mr. Underwood graciously offered on behalf of Nucor to donate the funds to cover the cost of disposal. We would like to request permission to accept this donation.
