

Superintendent's Student Advisory Council

Jefferson County Public Schools
Board of Education Presentation
May 25, 2021

Who We Are

Our Purpose

We feel strongly that student representation and voice can lead to improvement in our schools throughout the district.

The Question we are trying to answer

How can students represent the voices of their peers
and have input into decision making?

Through our discussions, we formed a goal of
including student representation on our School
Board.

We Researched Other School Districts with Student Representatives

We strived to have a well informed and researched plan, taking into account as many different school districts with student representation as possible to inform our decision making.

We Brainstormed Ways to Represent all JCPS Board Members' Districts

Opportunity  Equity  Equal Representation

We Developed a Plan and a Policy

Our Creation Process

Individual Plan Submission

Vote and Refinement of Final Plan

Collaboration with administrators to form Policy

Policy Revision

The Plan was Presented to the Policy Committee

Two students presented the plan to the JCPS Policy Committee, after which we received feedback to improve our course of action, and make revisions.

What we Learned

Throughout our process, the ideas of equal representation, equity, and accountability were present, and our group as a whole both grew and learned from this endeavor

Next Steps

Thank you for the
opportunity to
present our project.
