

Board Report

Jim Seward, District Technology Coordinator
June 2021

Phone System

We have just completed the phone system upgrade. We are working through a couple of 'bugs'. The new system makes us compliant with Kari's Law and Baum Act (911 dialing and 911 building location notification).

Summer School

After collecting devices that were used for NTI, we were able to get the devices cleaned, sanitized and re-imaged for the summer school program.

One-to-One Project

All new devices have been received. We are working to image and get ready for the new school year. 6th and 9th graders will get a new device for their respective education 'career' in MS / HS.

Wireless Project

We are working to finalize getting the equipment ordered. We will then be working toward installation timing.
